Git 画图游戏

思沃学院

一、本机简单使用 (熟悉git基本操作)

游戏形式

- 在一块白板上,画出**三个**区域:"工作区","暂存区"和"本地 仓库"
- 邀请三位(也可以是三组)同学,分别操作每个区域
- 这些小人可以直接由同学在白板上画出来(增加趣味性), 也可以事先做好卡片,用胶泥贴上
- 每个操作都由"工作区"同学发起,他更改了自己的小人形像 后,说出相应的**指令**,其他同学跟着响应,改变自己的画像
- 游戏时可以将该幻灯片在投影仪上播放,大家跟着一页页的 内容操作

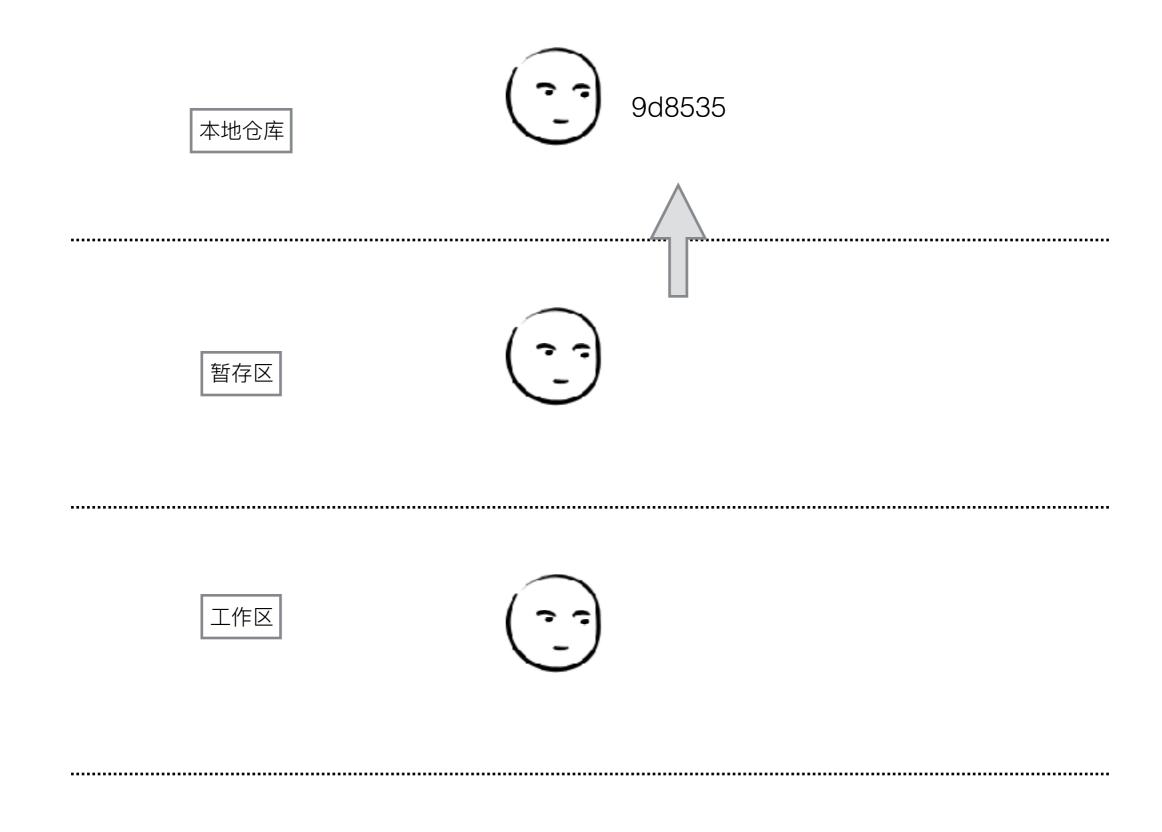

,	本地仓库			
	暂存区			
	工作区			

本地仓库		
暂存区		
工作区	(-)	

......

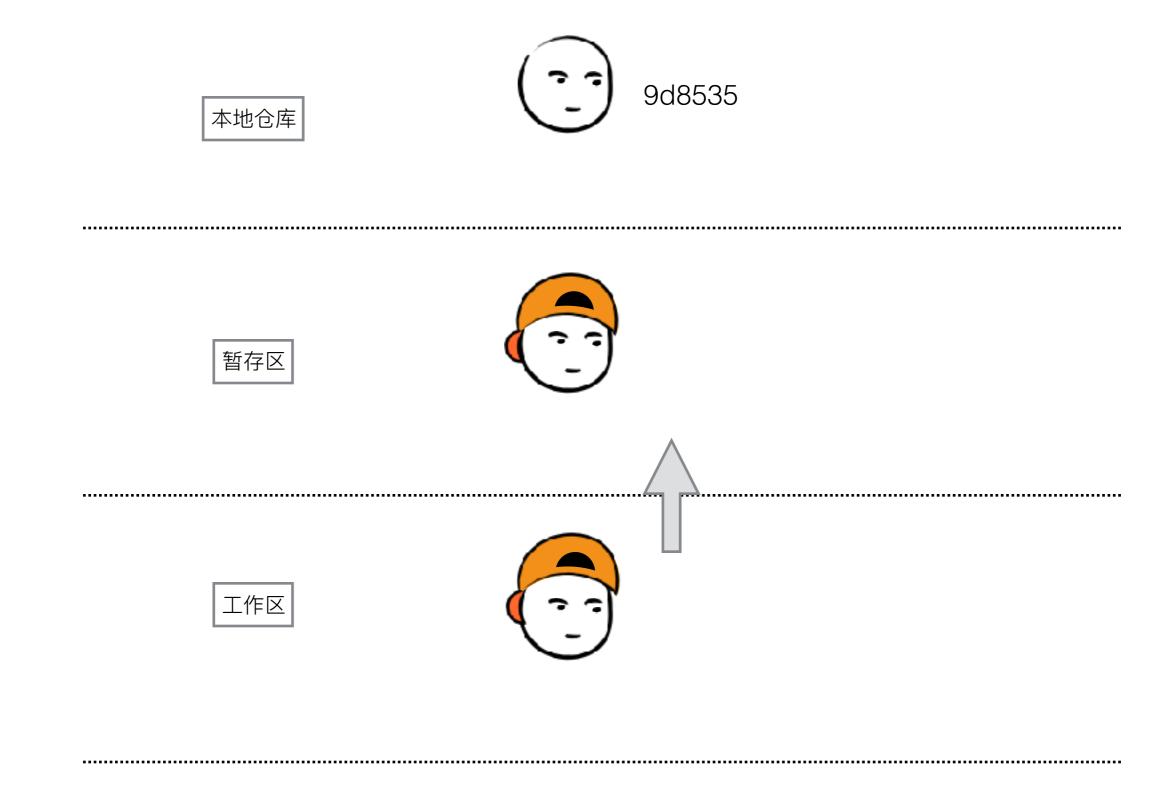

git add me.svg

看起来不错, 暂存起来

git commit -m 'head'

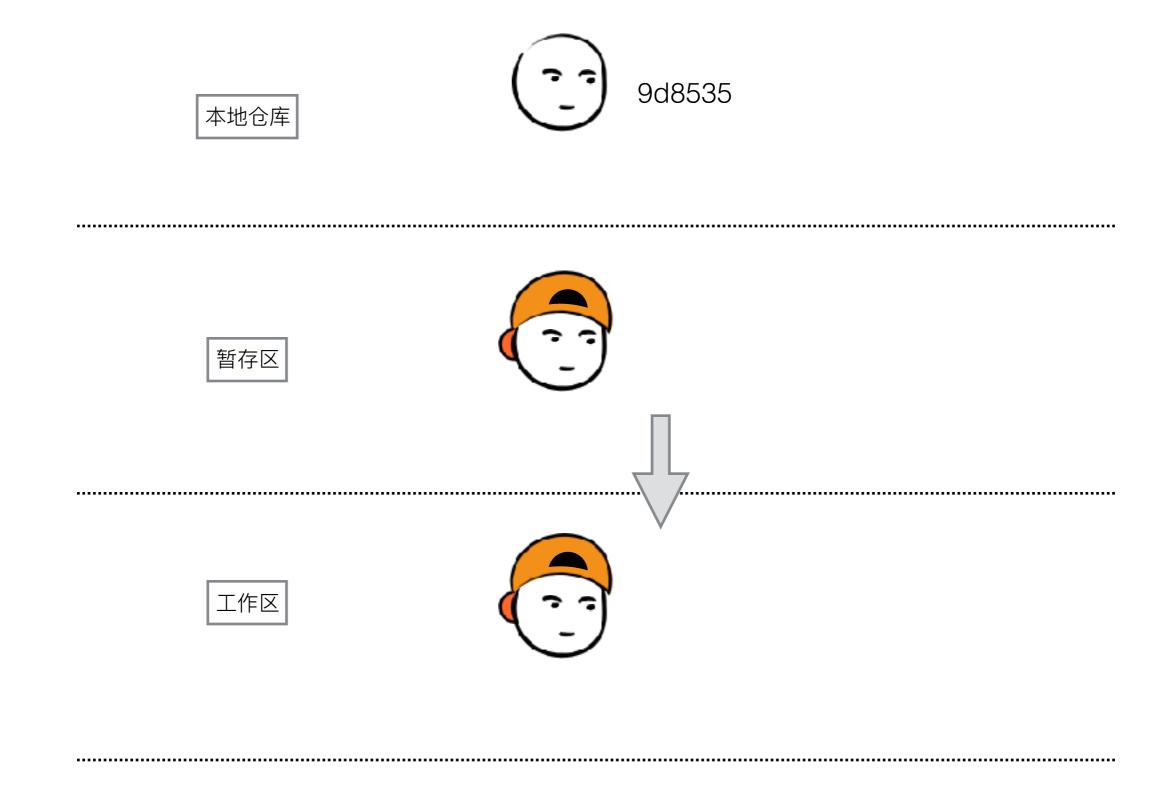

9d8535 本地仓库 暂存区 工作区

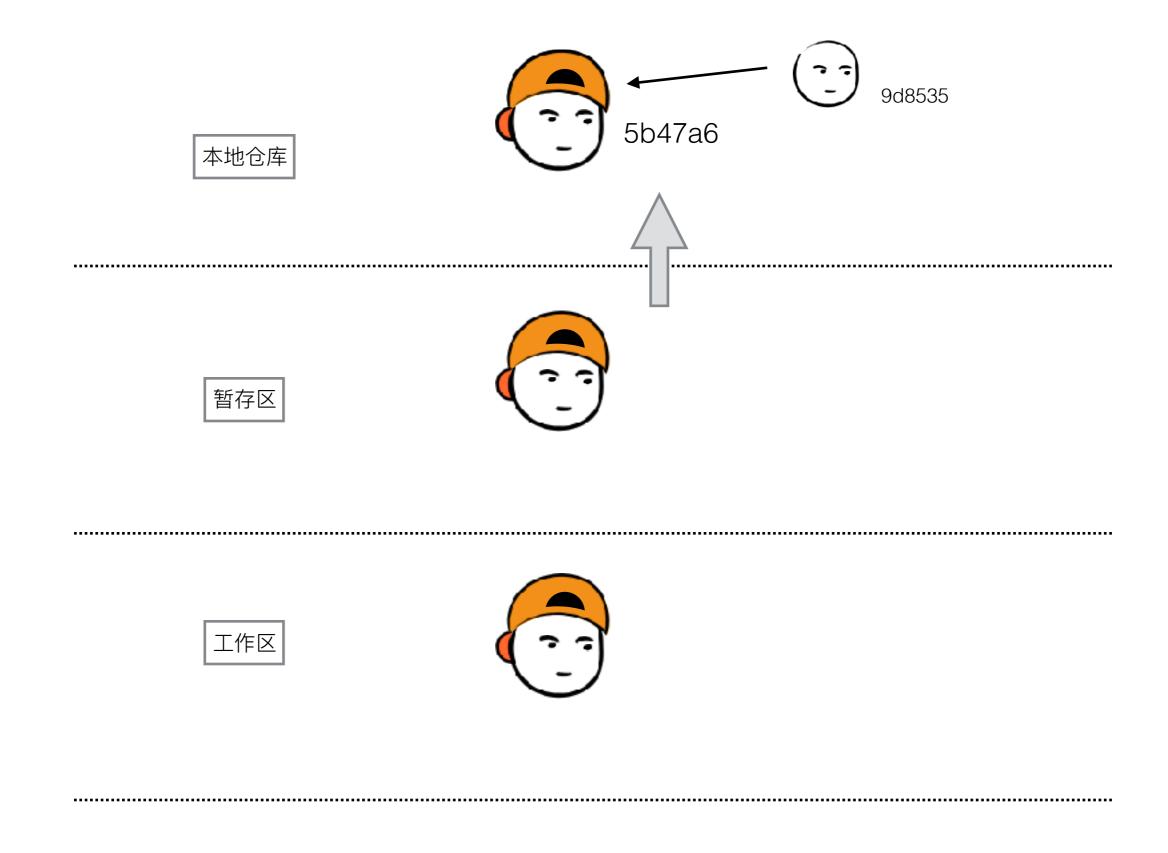

git add me.svg

不错, 暂存起来

9d8535

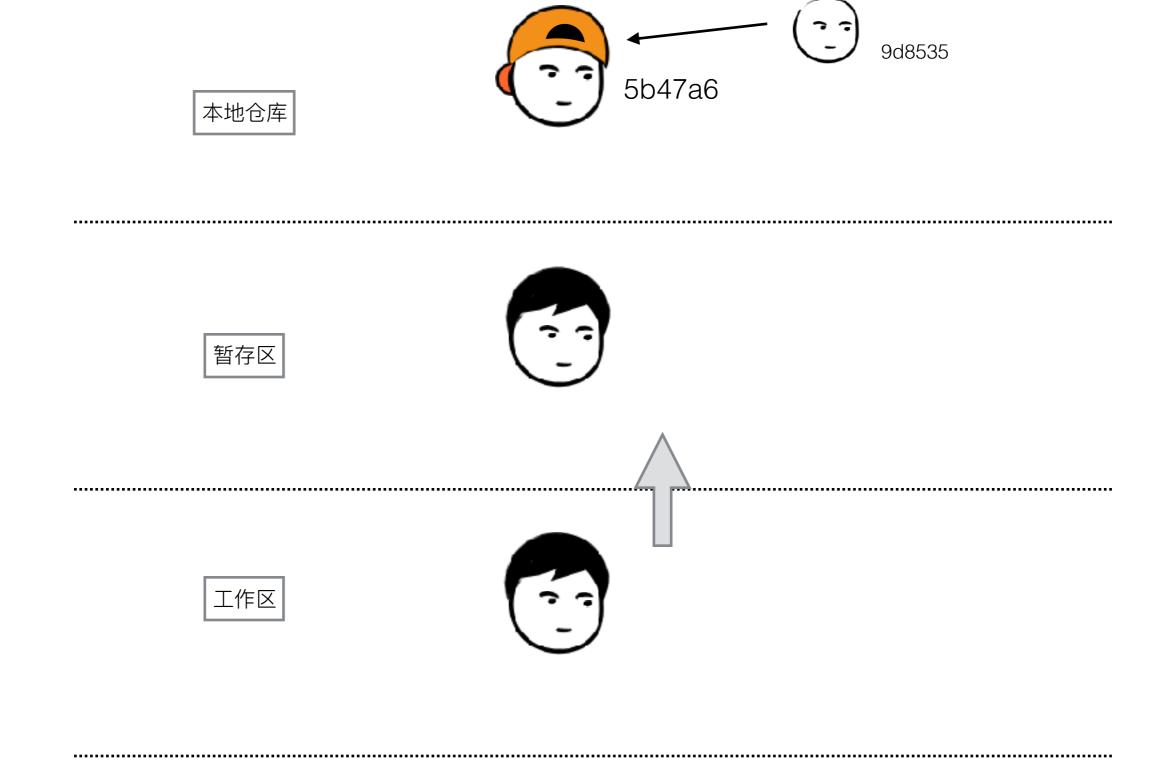

git checkout me.svg

git commit -m 'new hat'

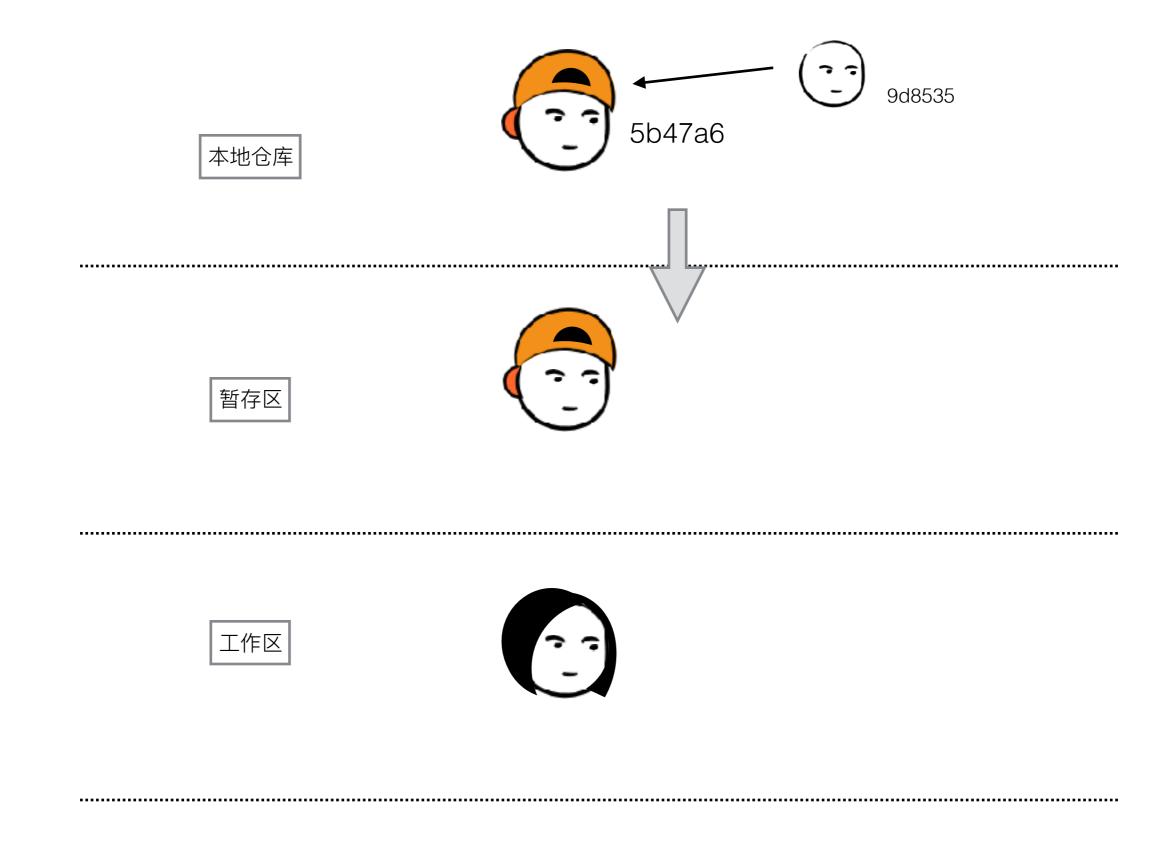

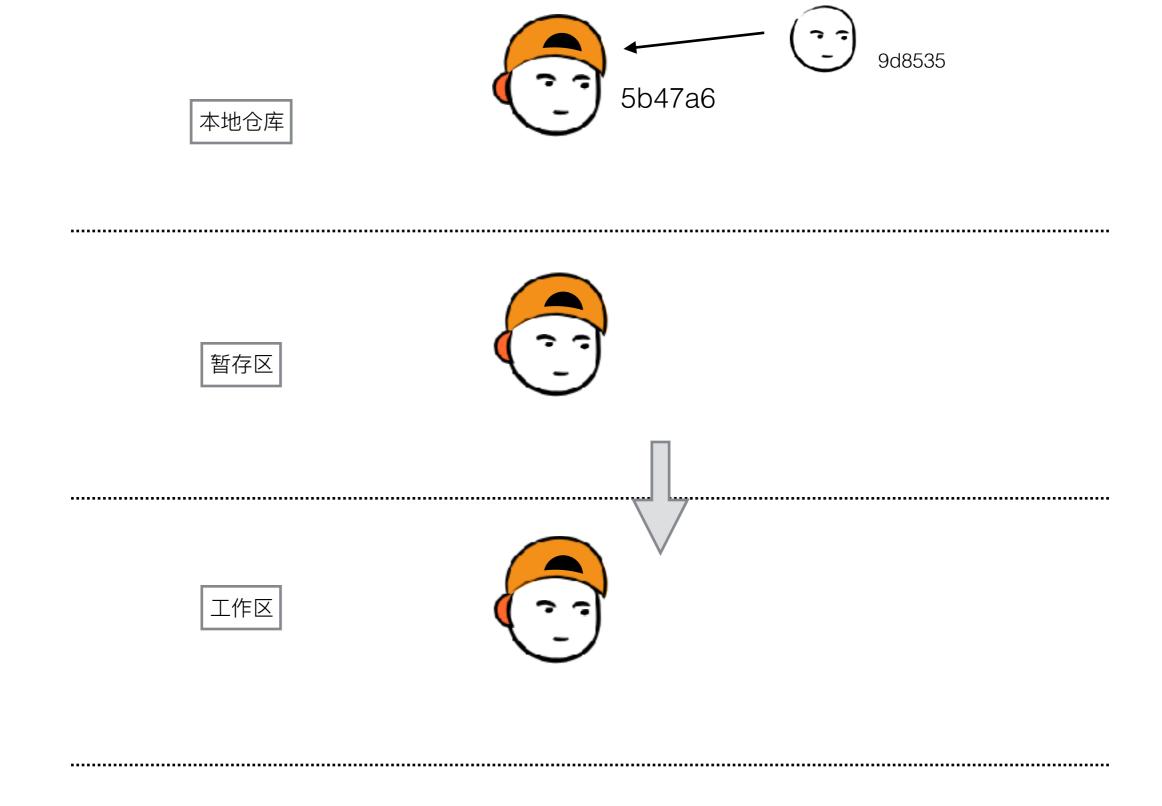

git add me.svg

看起来还不错, 暂存起来

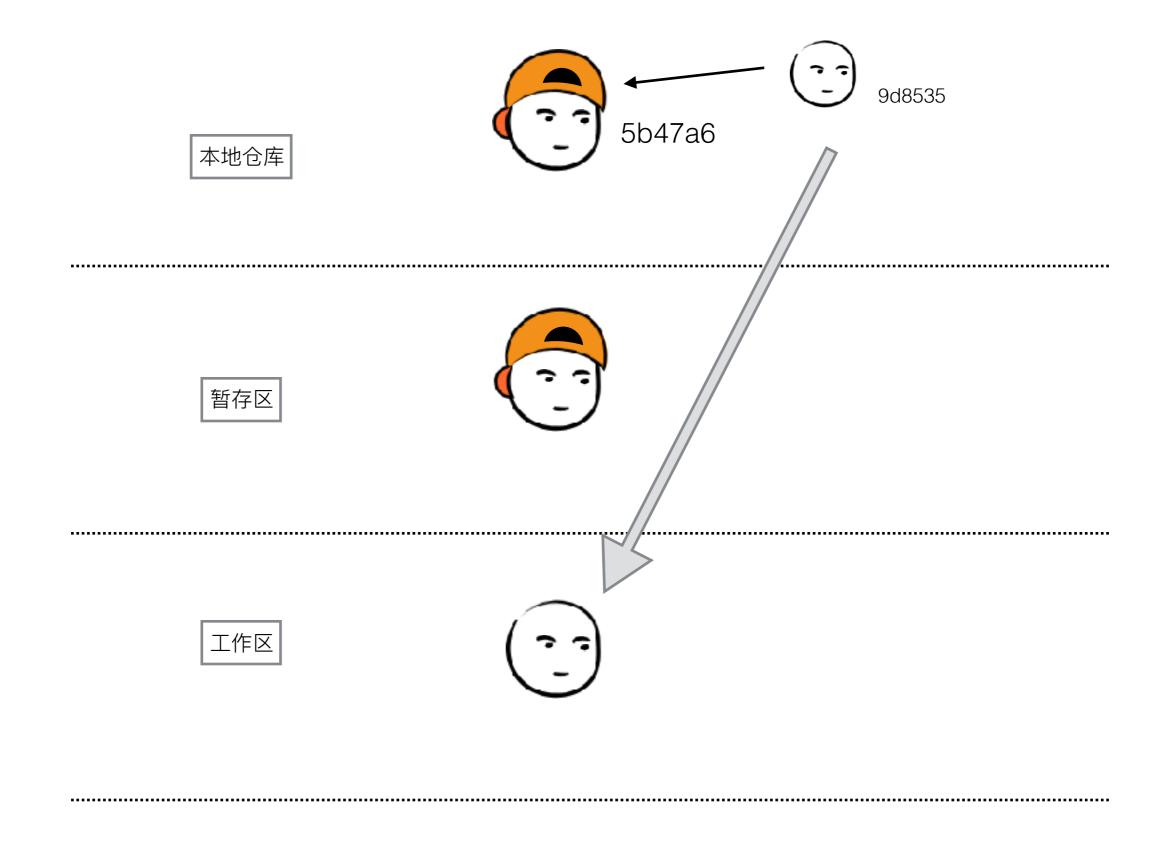

git reset me.svg

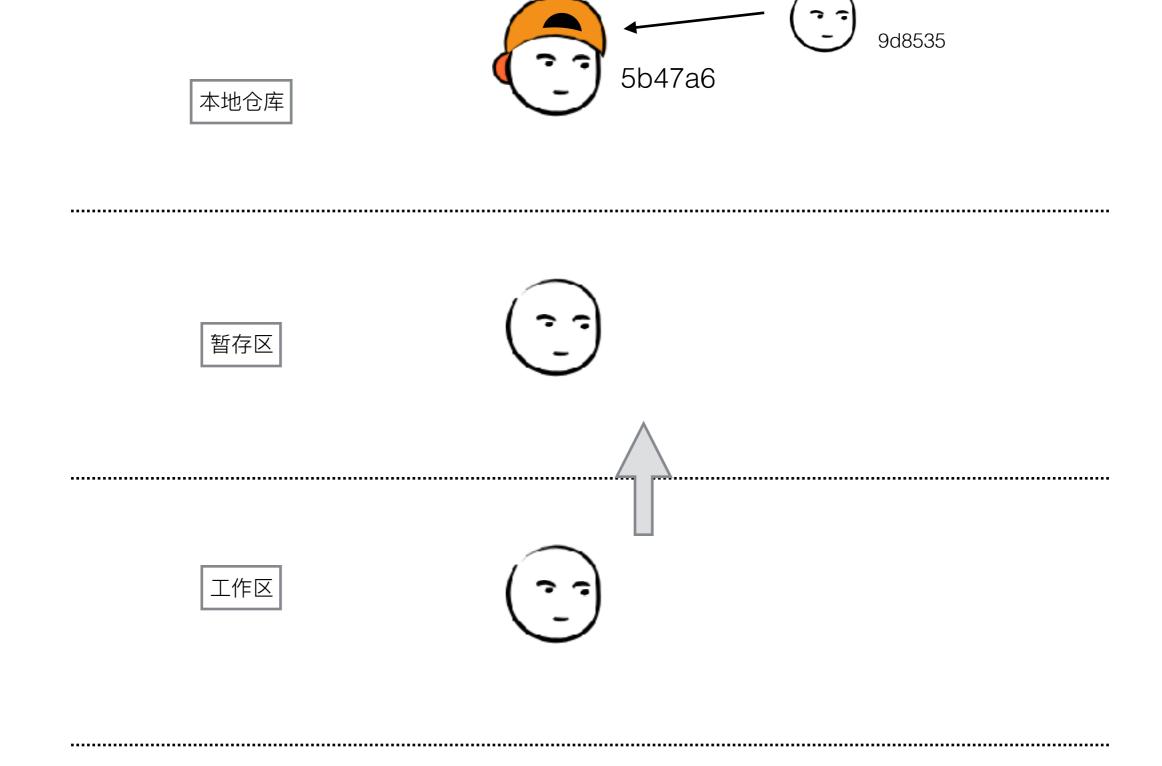

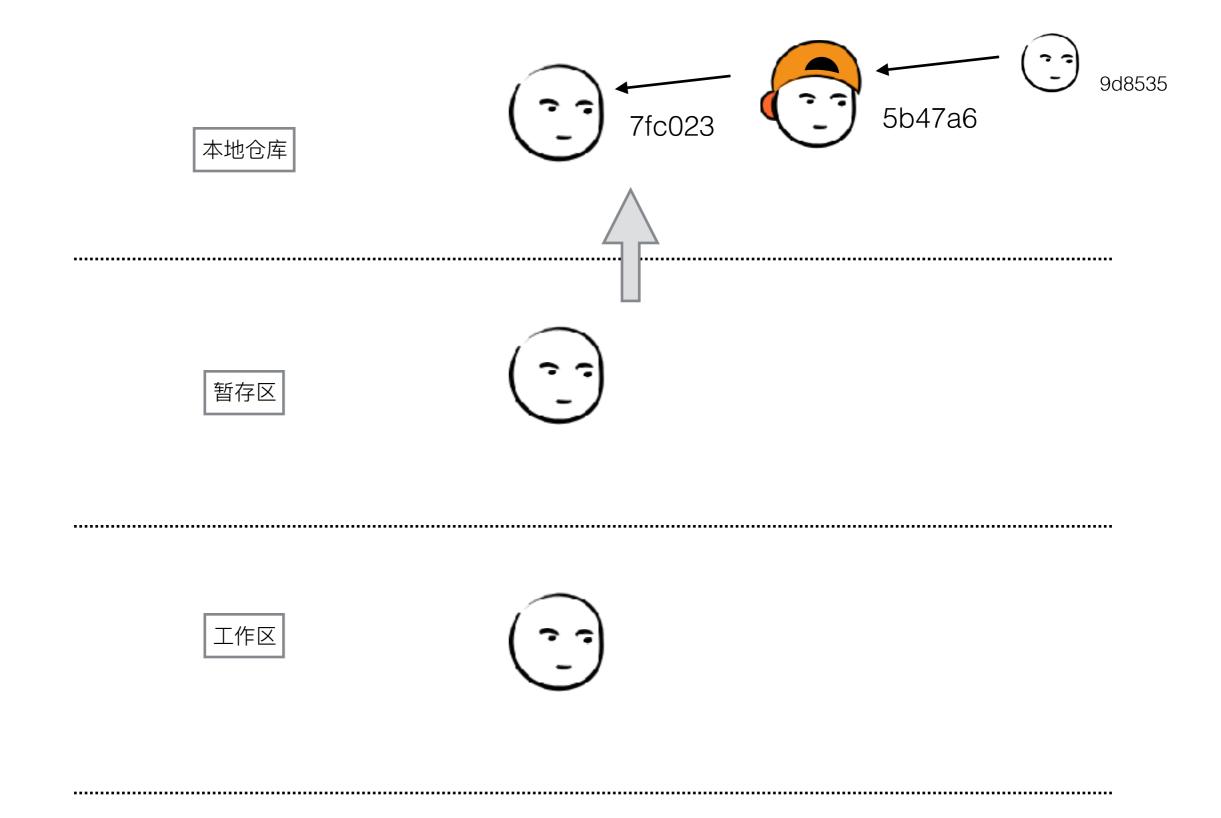

git checkout me.svg

不喜欢,回到帽子吧

git revert 5b47a6

二、本机分支操作

游戏形式

• 跟前面一样

本地仓库

暂存区

工作区

git init

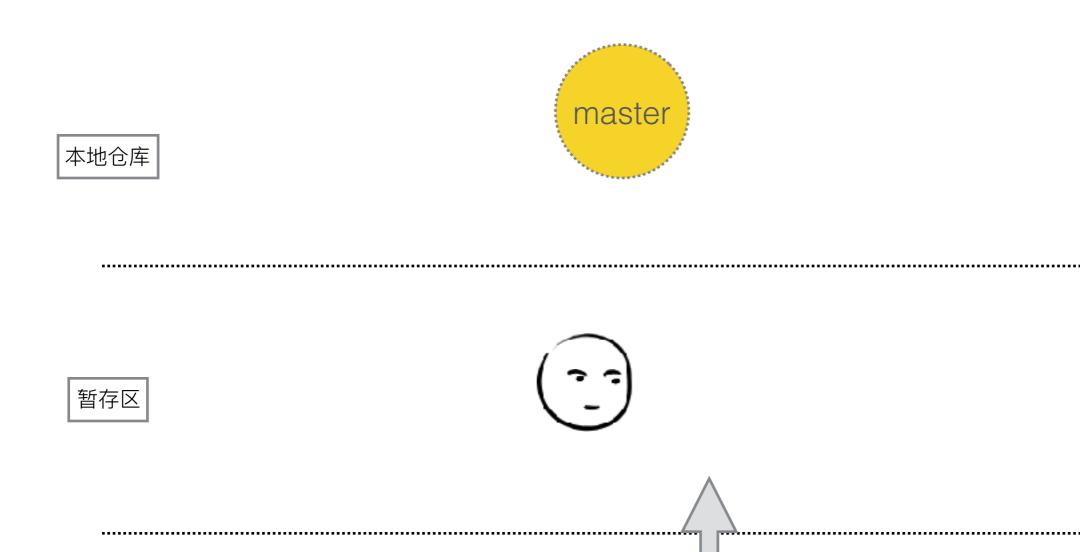

本地仓库

暂存区

工作区

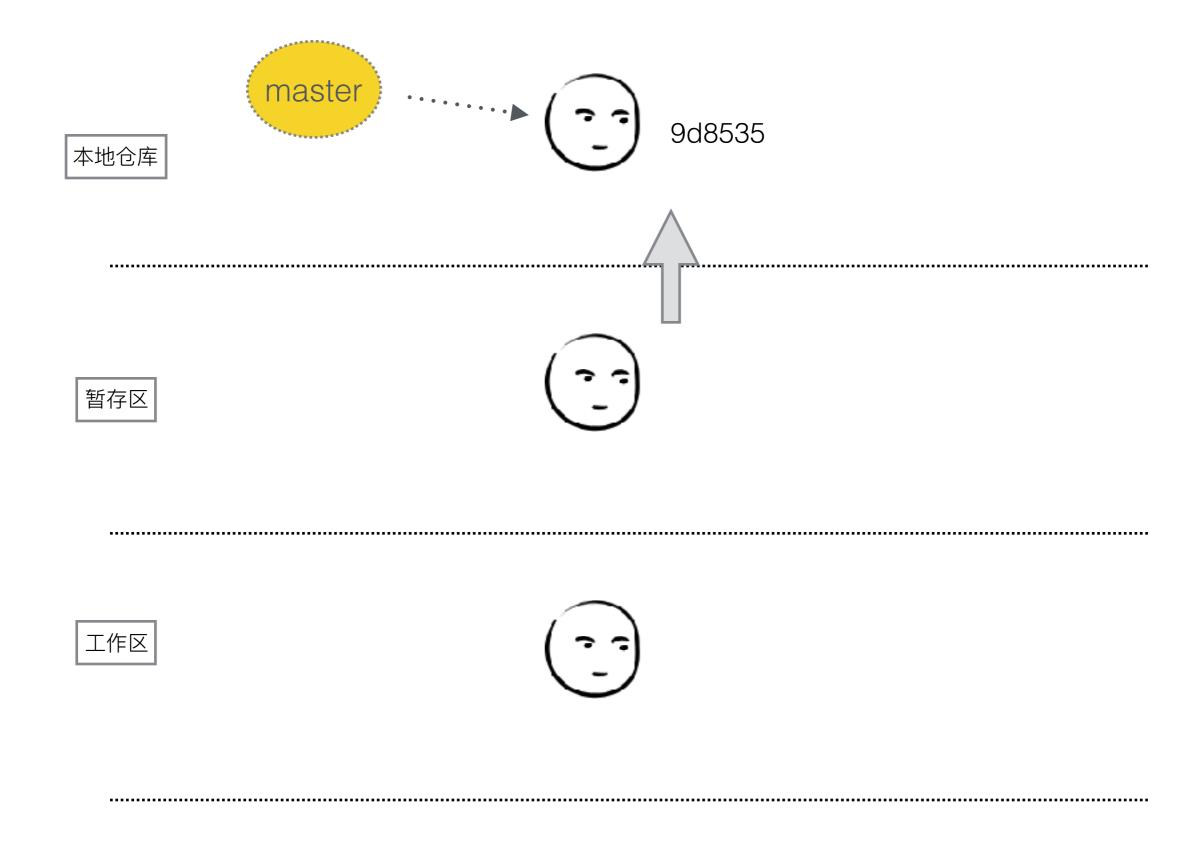

.....

工作区

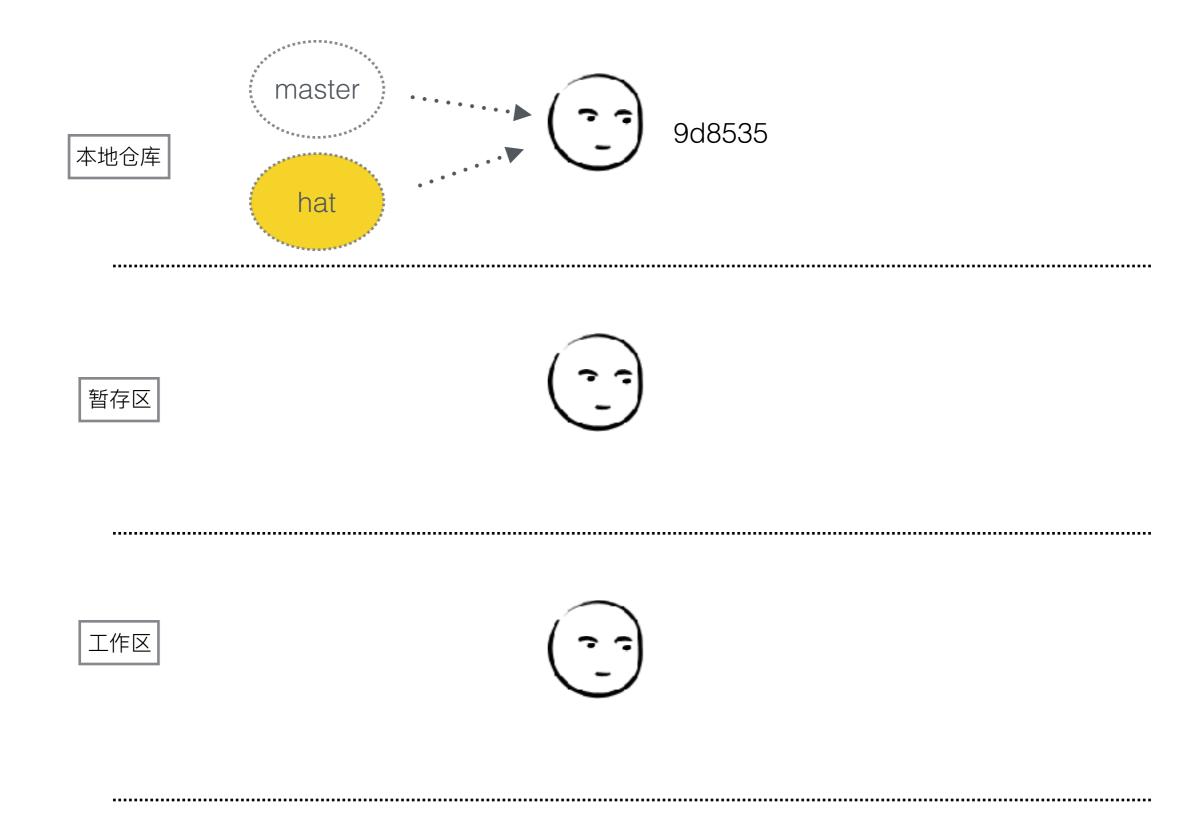

git add me.svg

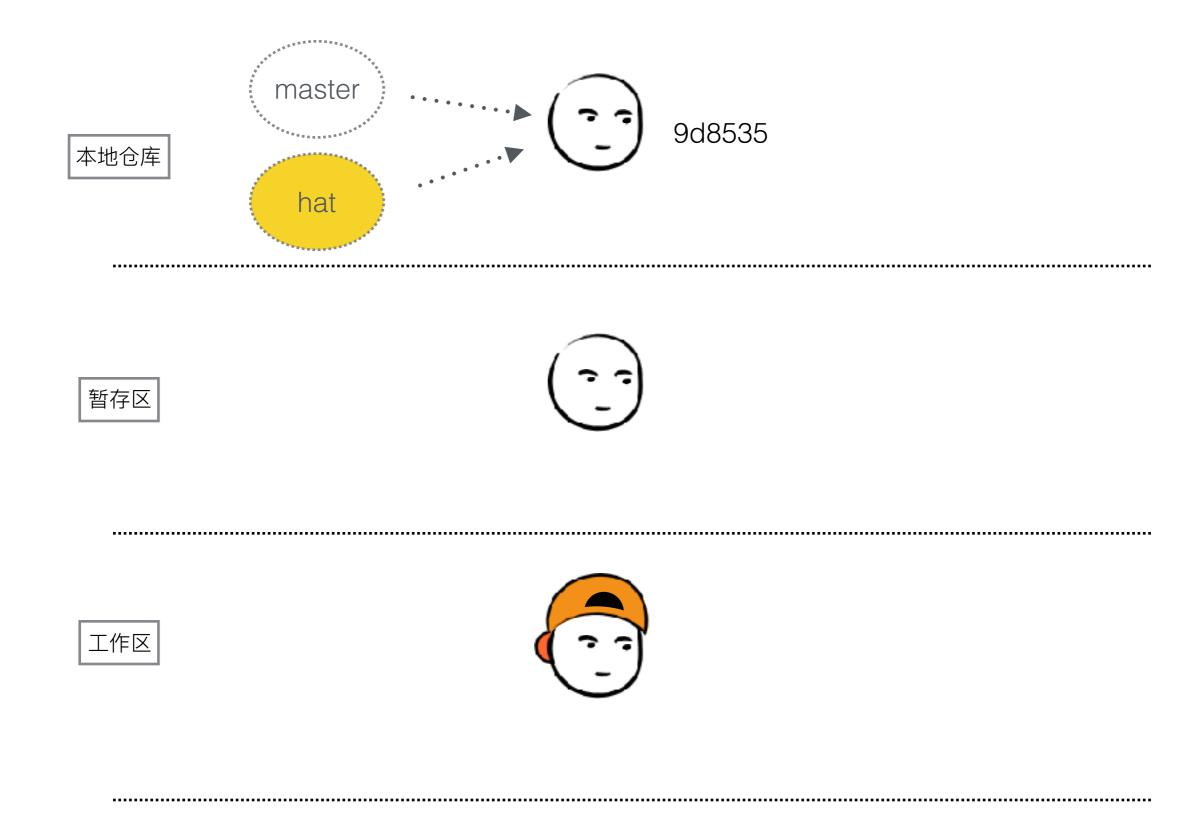

git commit -m 'my head'

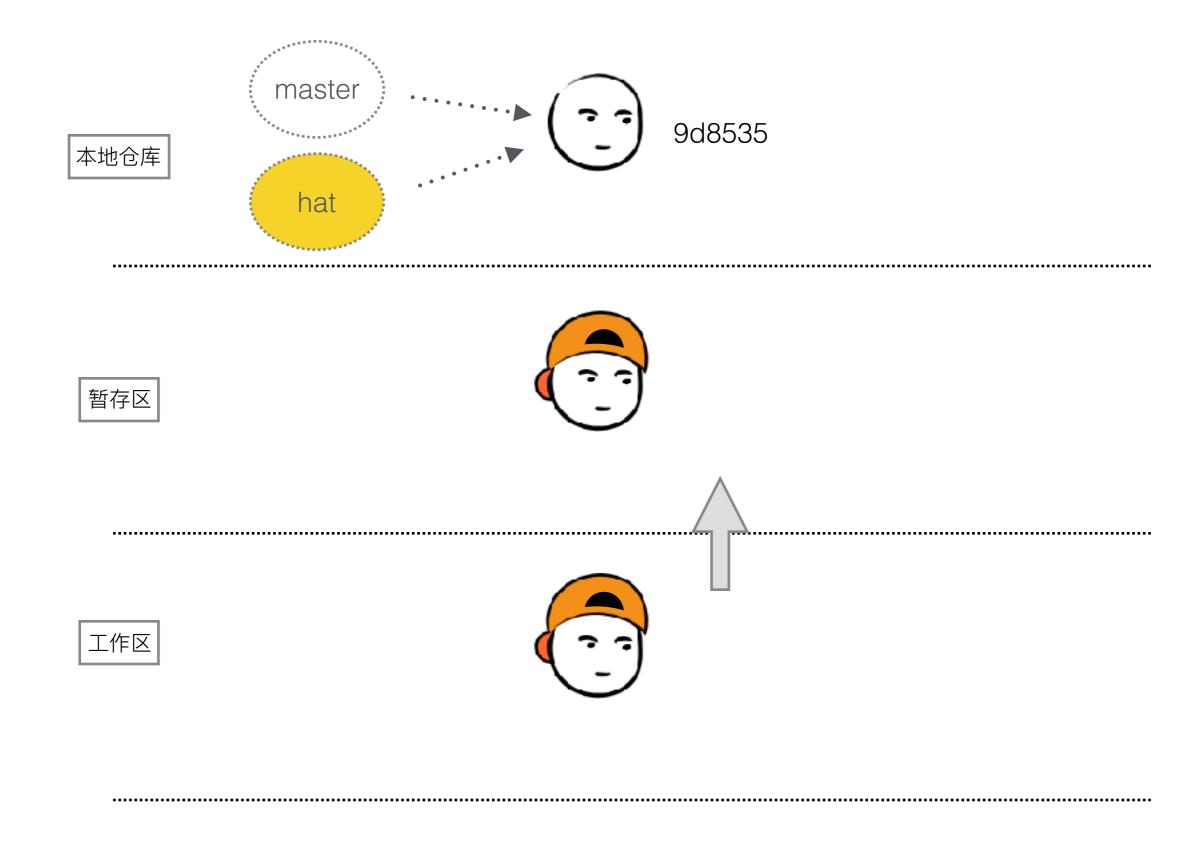

我既想试试光头戴帽子,又想试个很酷的发型,怎么办?

分支!

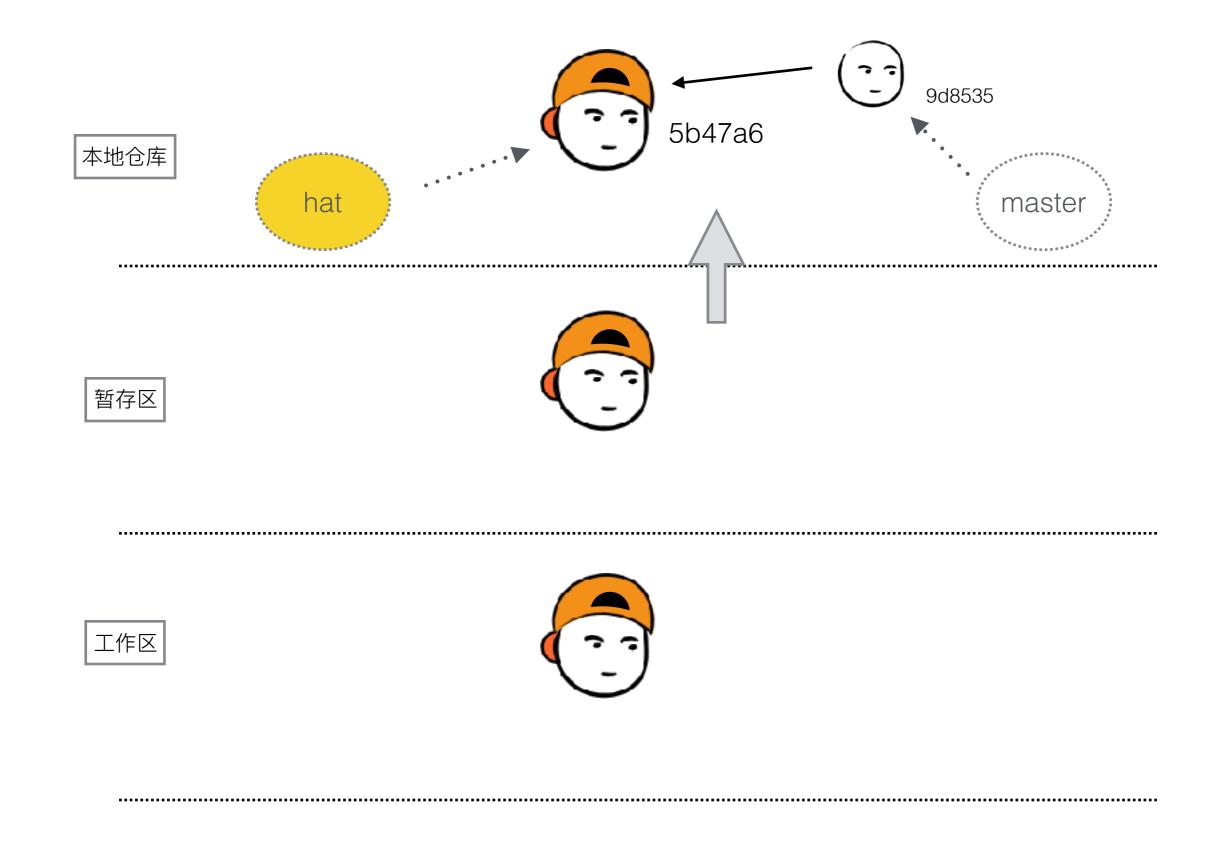

git checkout -b hat

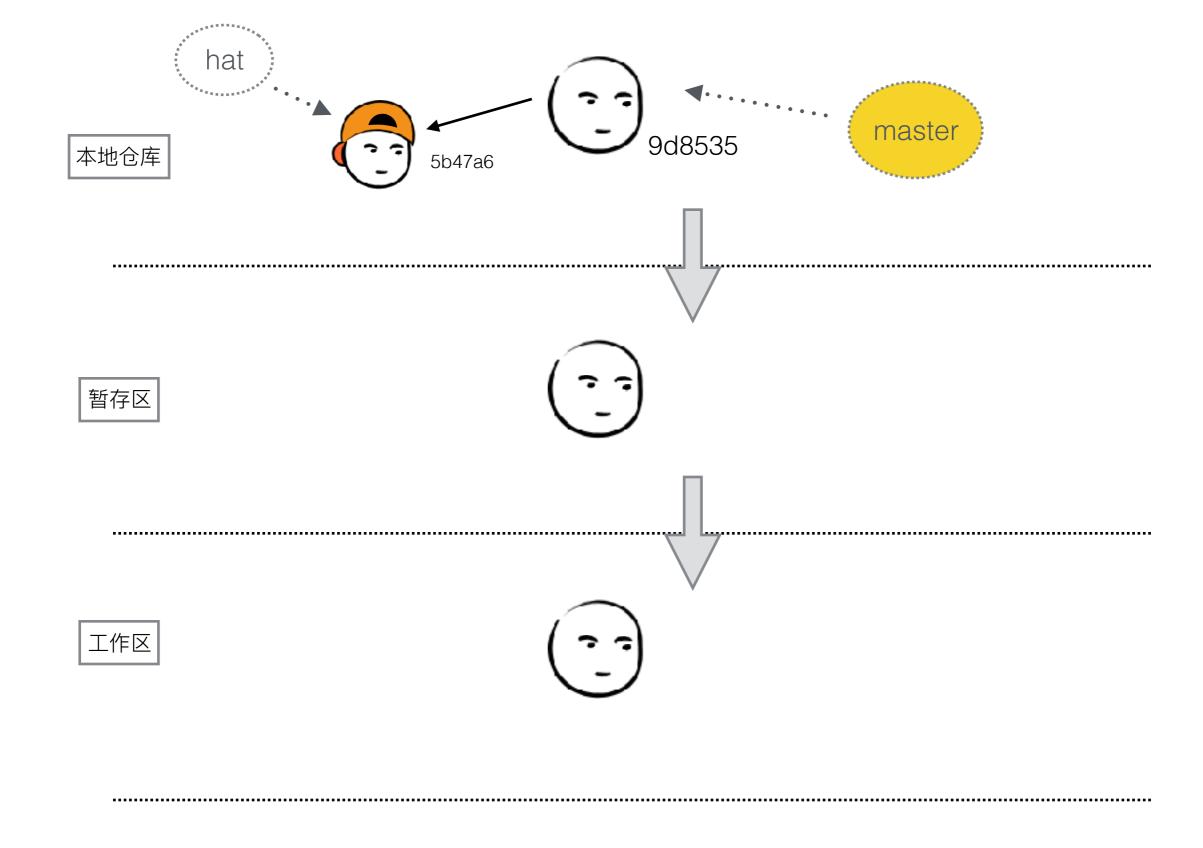

git add me.svg

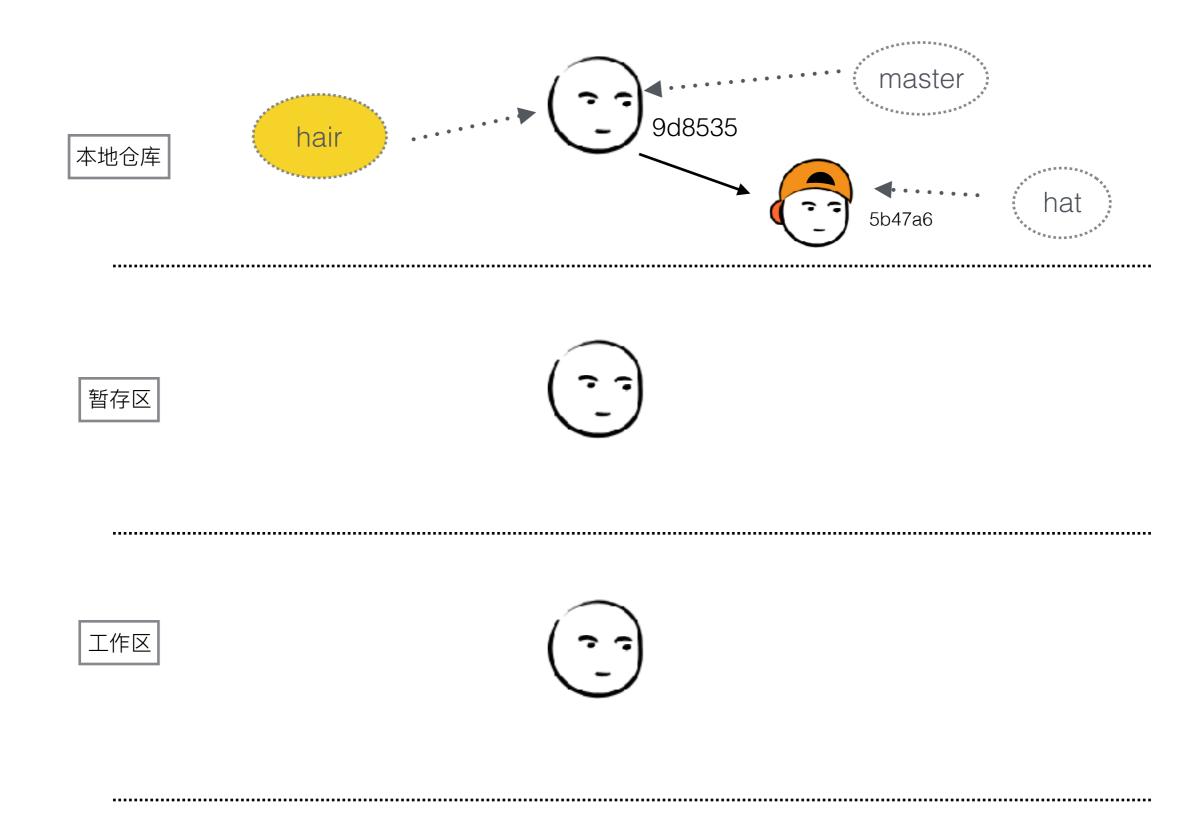

git commit -m 'my hat'

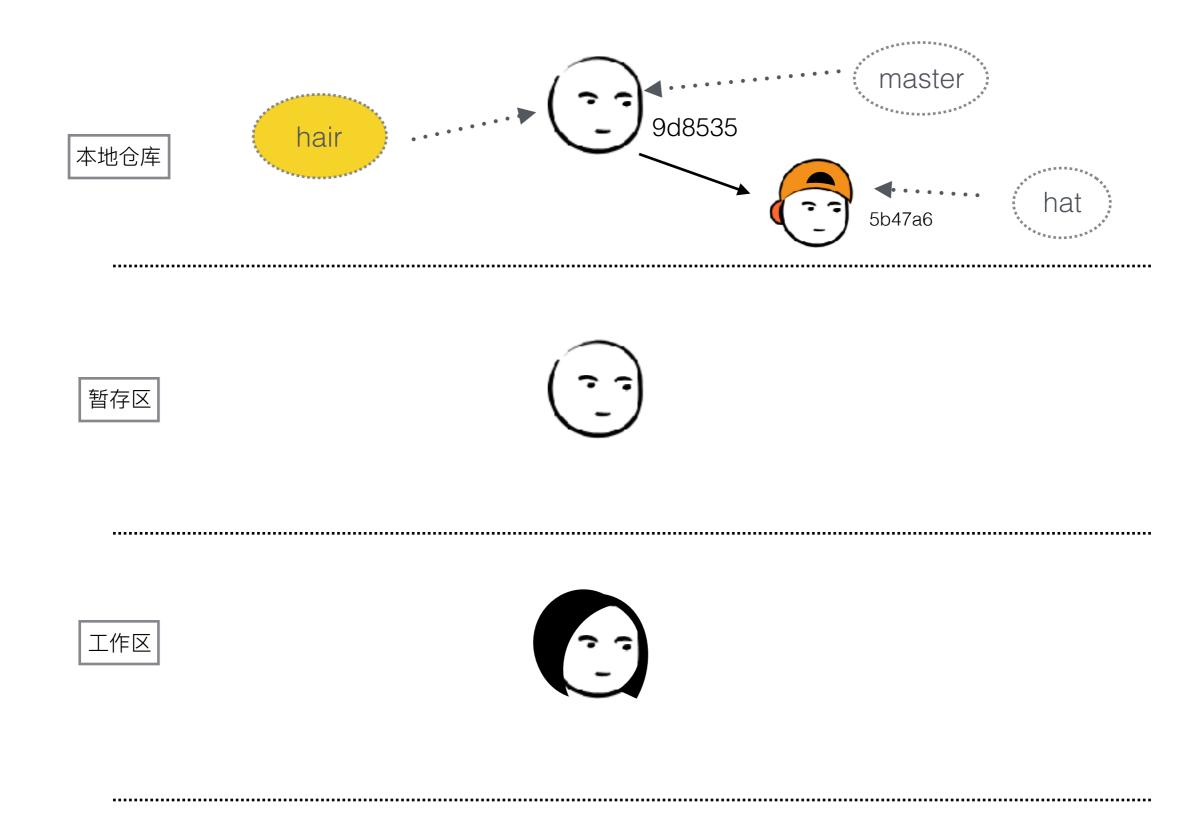

很满意,提交入库

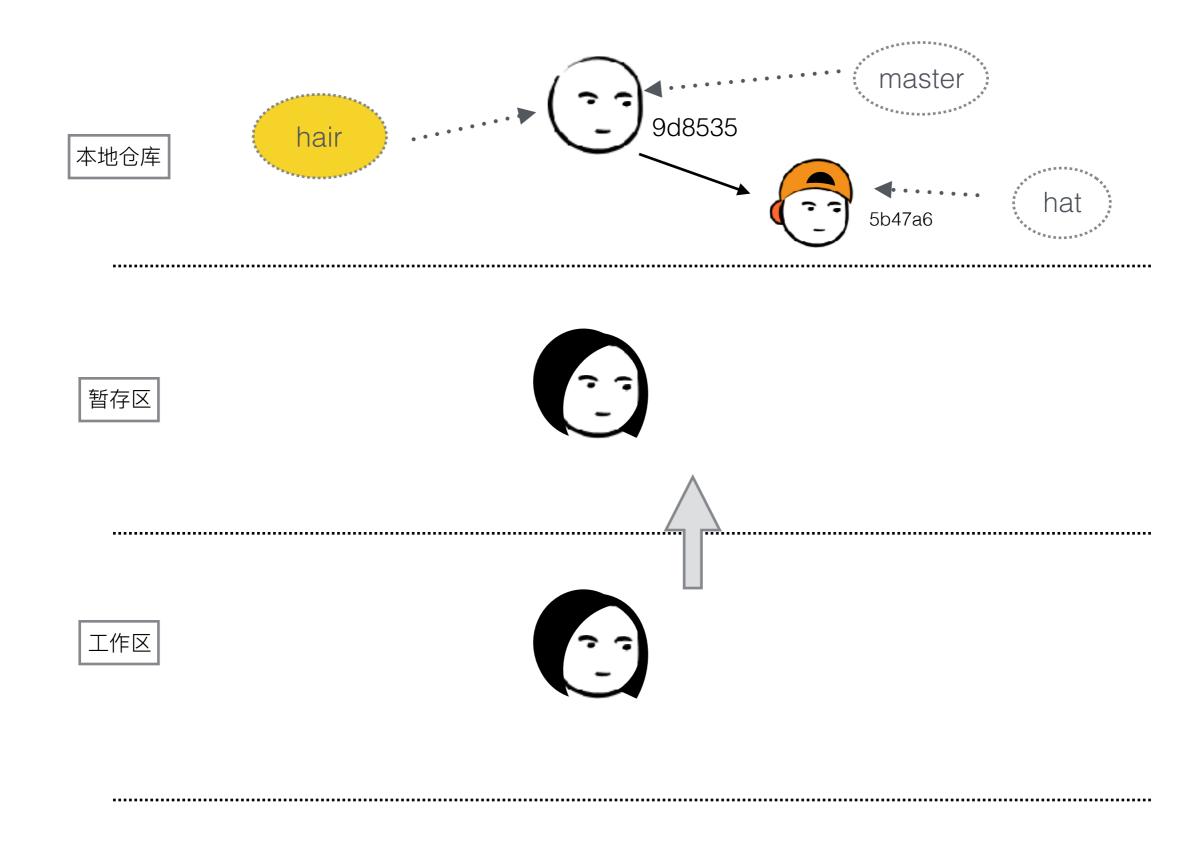

git checkout master

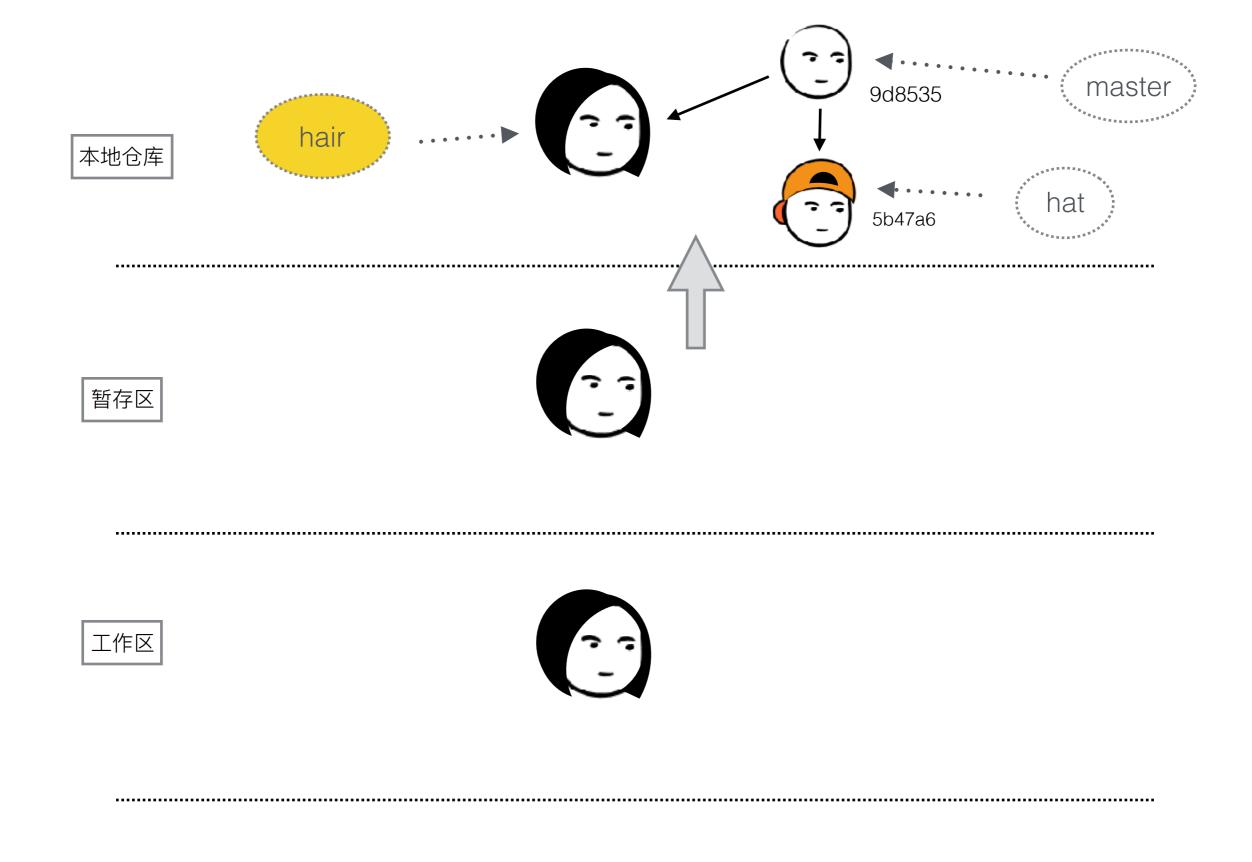

git checkout -b hair

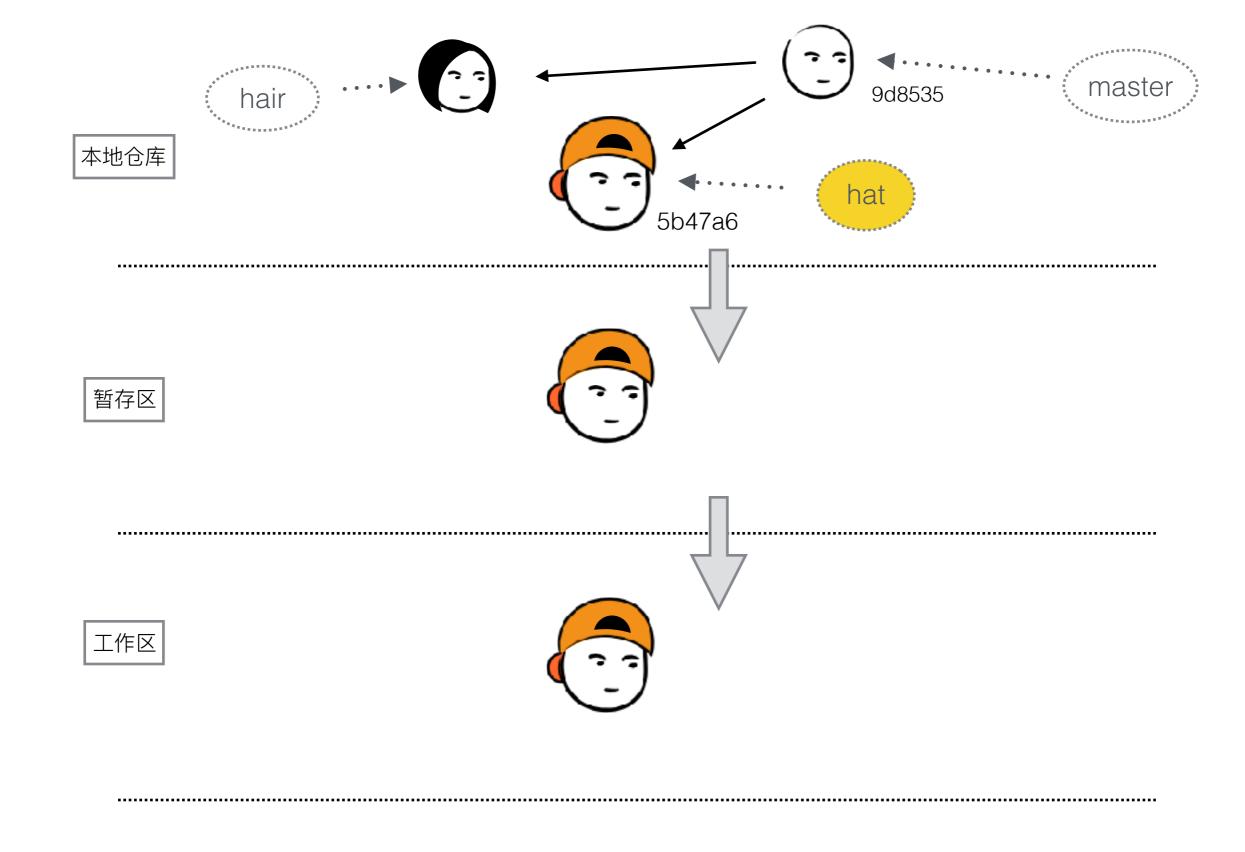

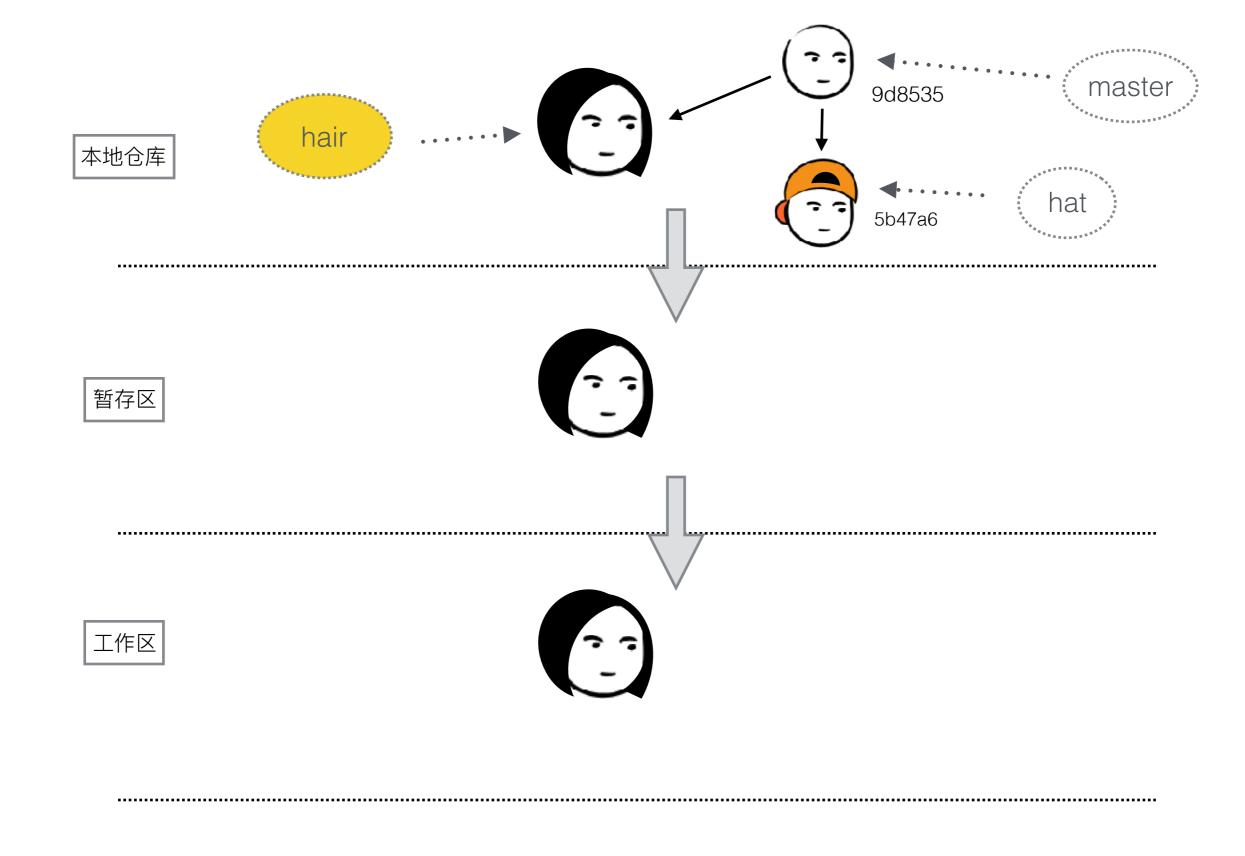

git add me.svg

git commit -m 'my hair'

git checkout hat

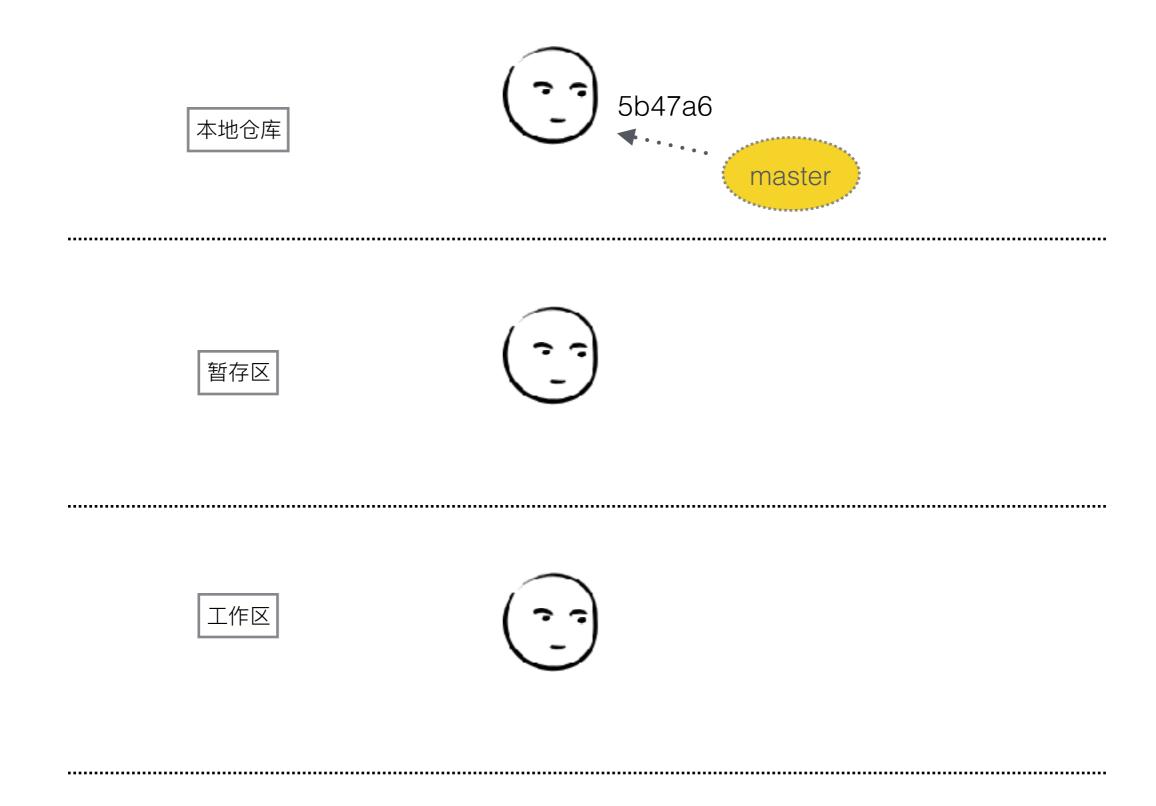

git checkout hair

三、远程协作

游戏形式

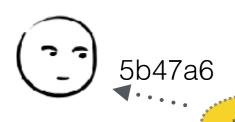

- 使用三块白板,分别供左边团队,右边团队和远程仓库团队使用
- 在左右团队的白板上,分别画出**三个**区域:"工作区","暂存区"和"本 地仓库"
- 邀请七位(也可以是七组)同学,分别操作每个区域
- 这些小人可以直接由同学在白板上画出来(增加趣味性),也可以事 先做好卡片,用胶泥贴上
- 按照幻灯片上的顺序与提示,由左右白板的"工作区"同学发起操作。 他更改了自己的小人形像后,说出相应的指令,其他同学跟着响应, 改变自己的画像
- 游戏时可以将该幻灯片在投影仪上播放,大家跟着一页页的内容操作

我在本地已经画好了我的头

有人想和我一起来画,怎么办?

远程仓库!

本地仓库

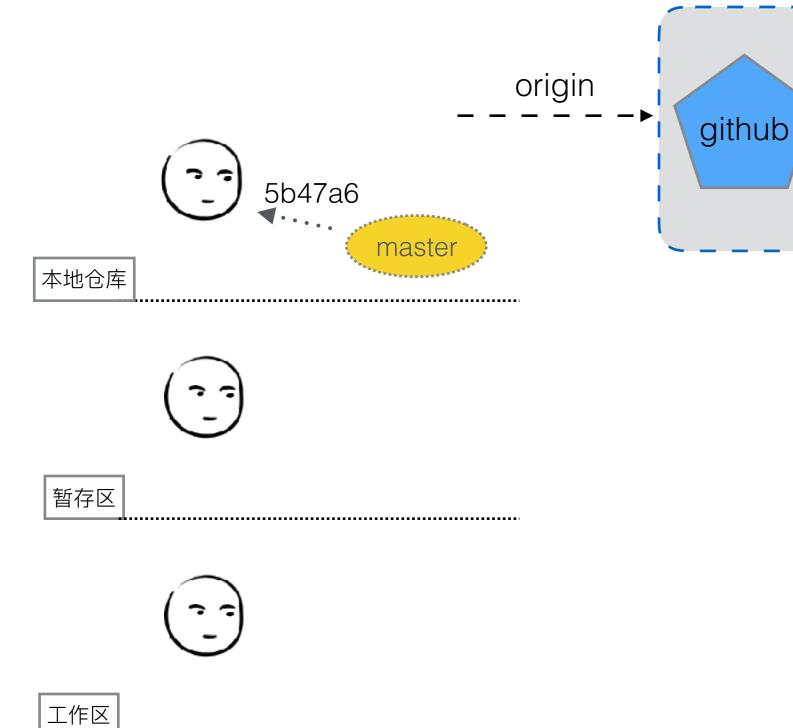

暂存区

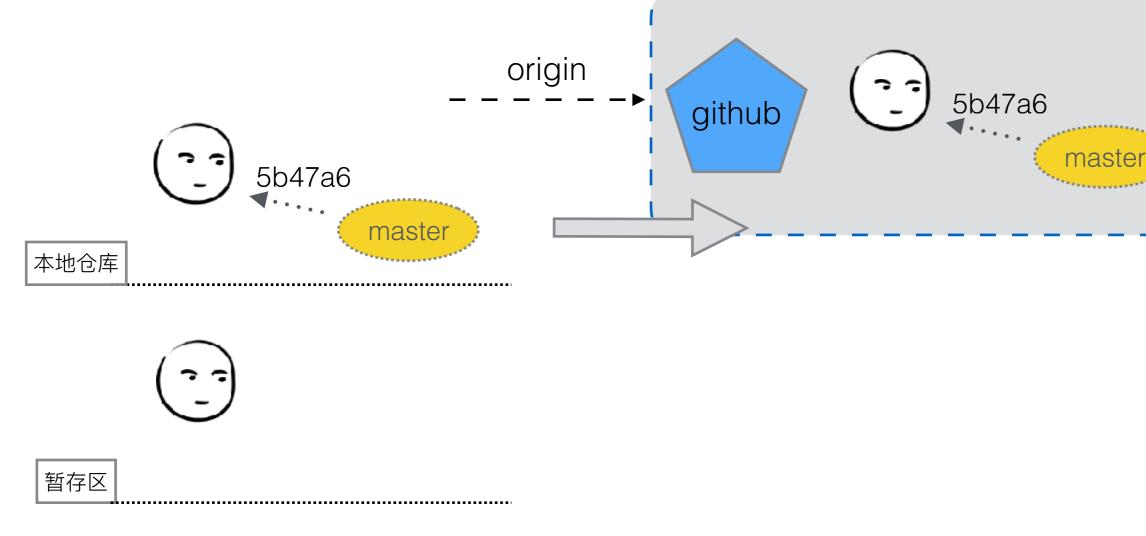

工作区

在github上创建一个仓库

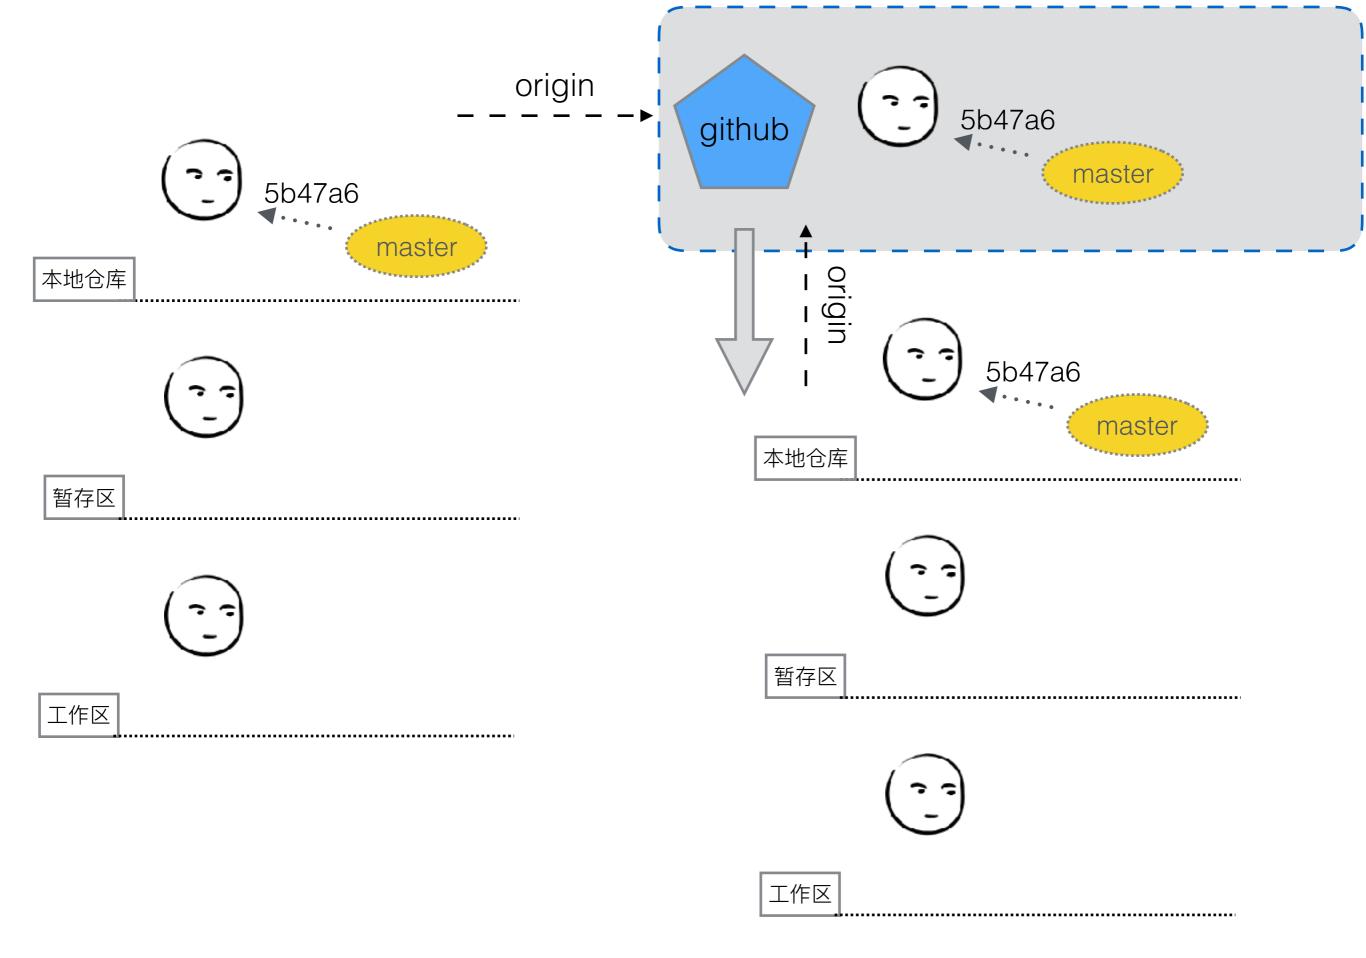

git remote add origin http://github.com/freewind/picture.git

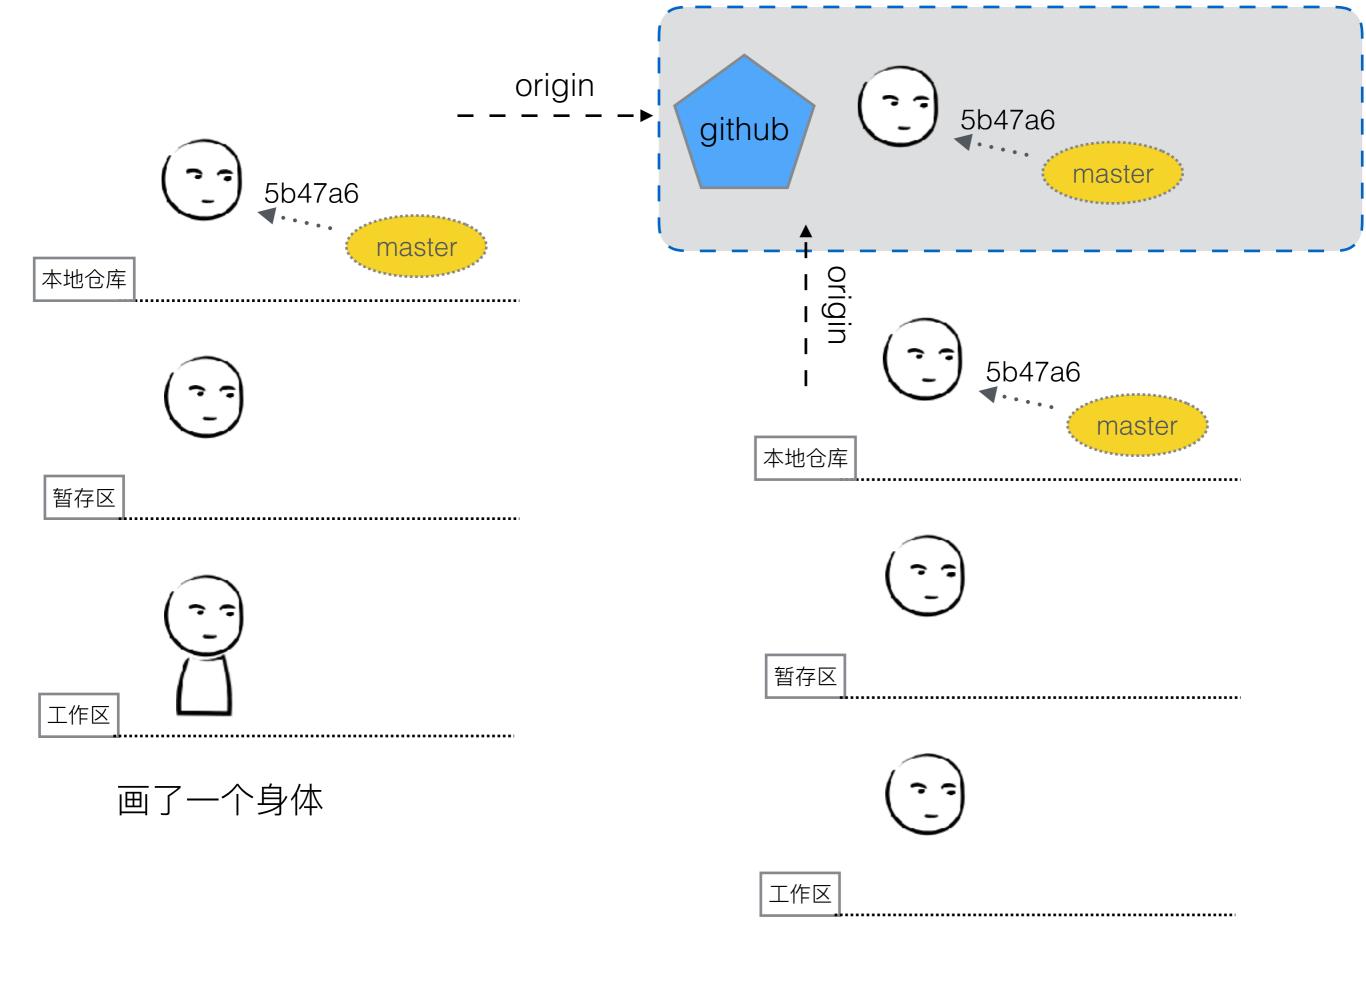

(-, -)

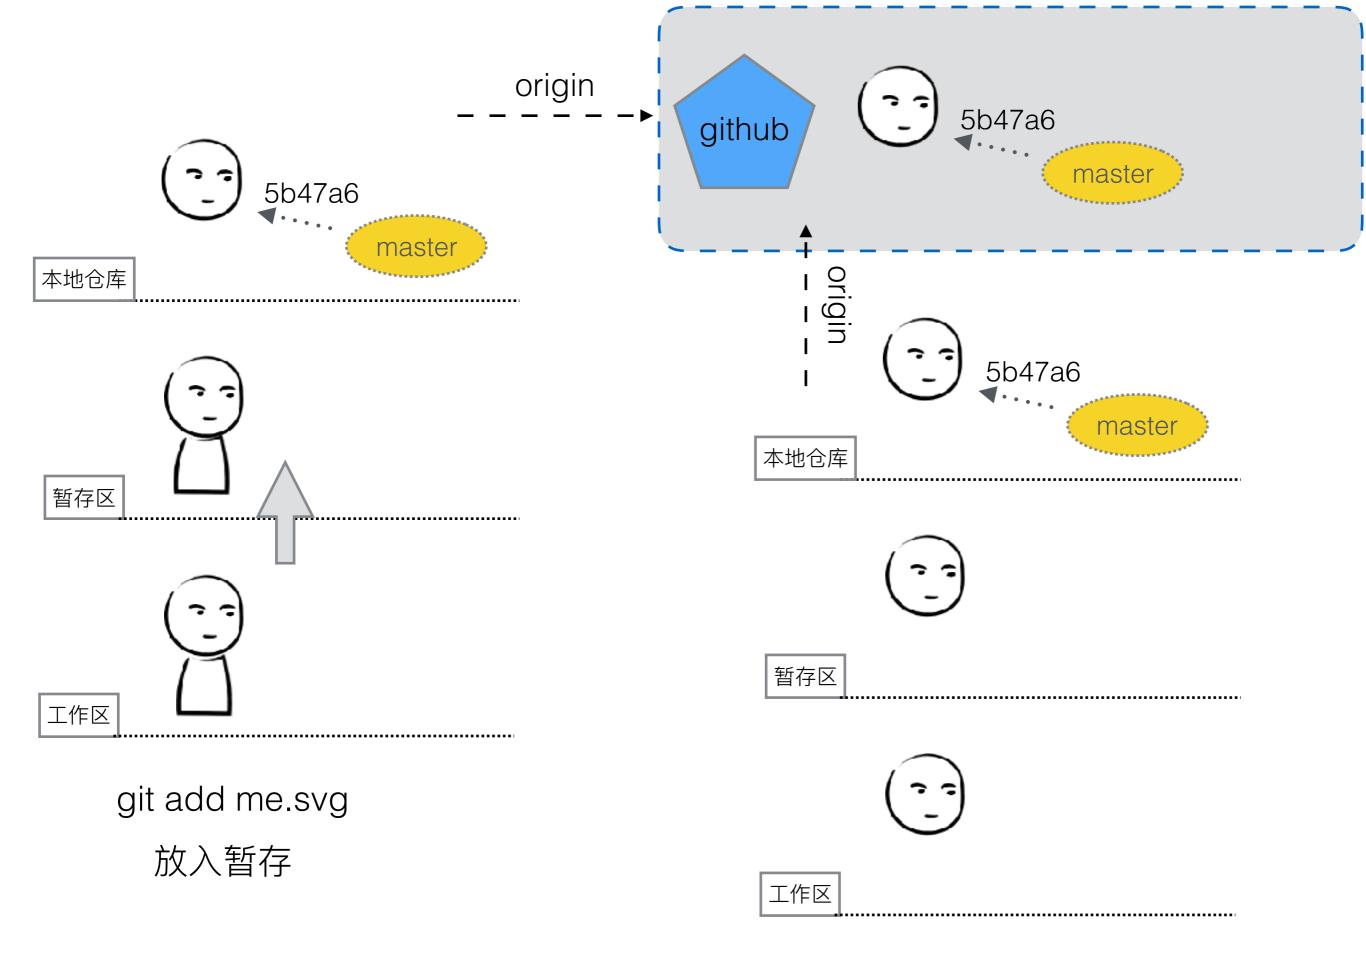

工作区

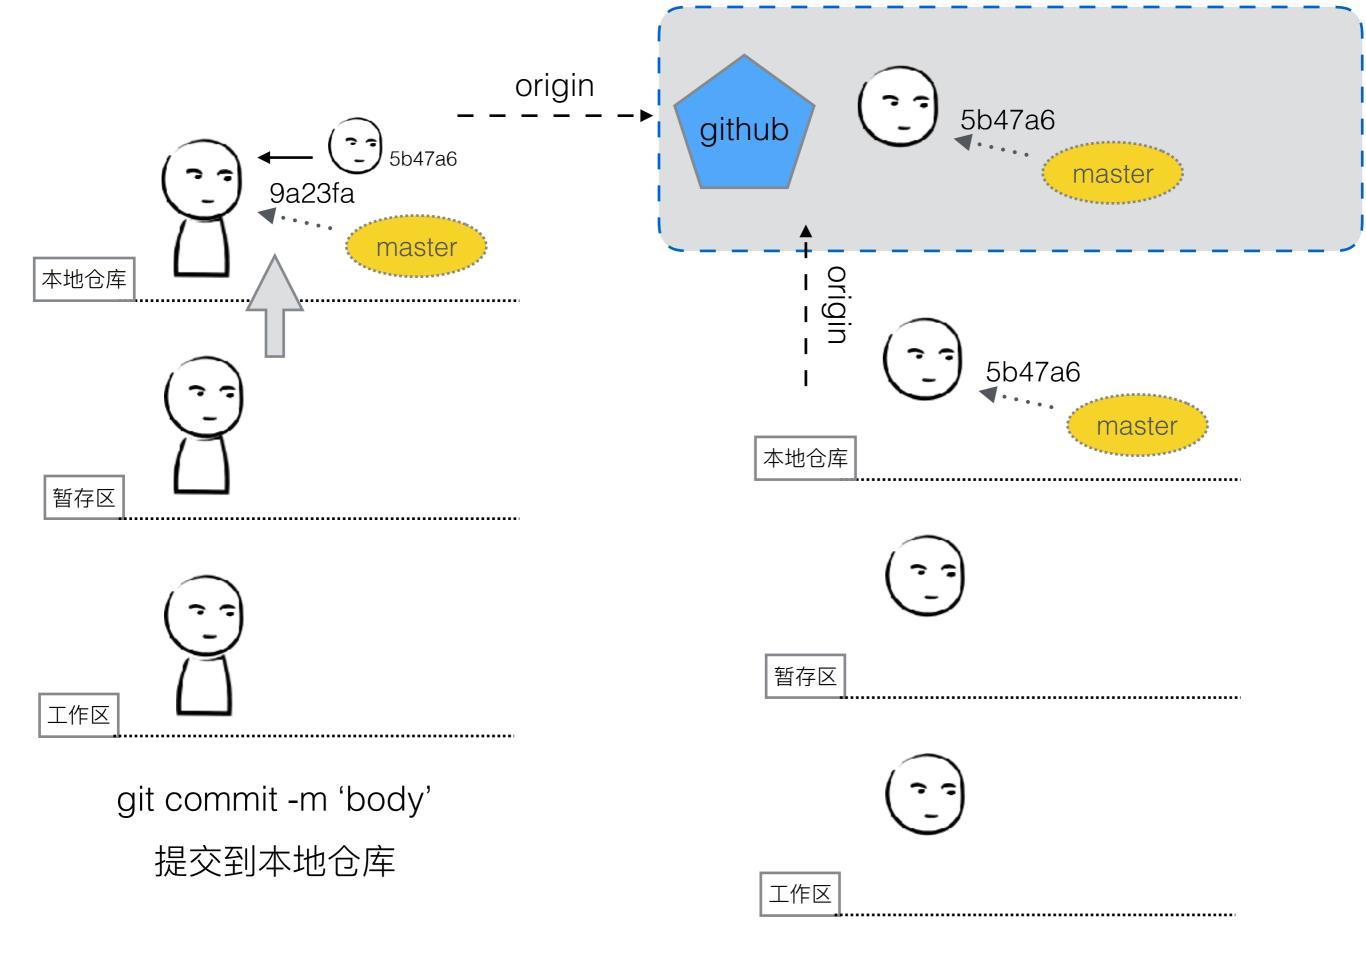

git push origin master

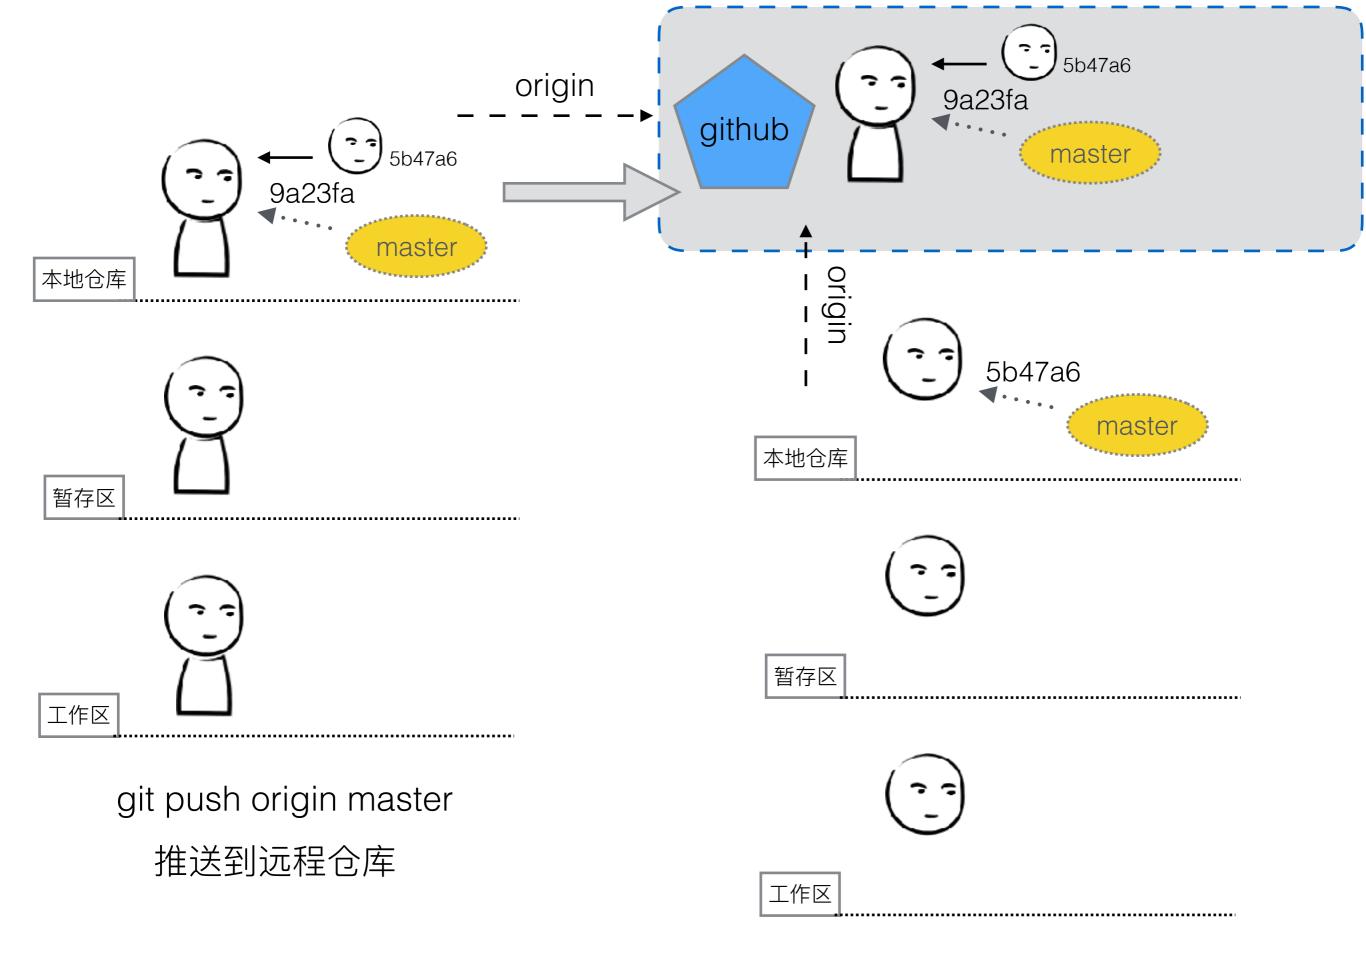

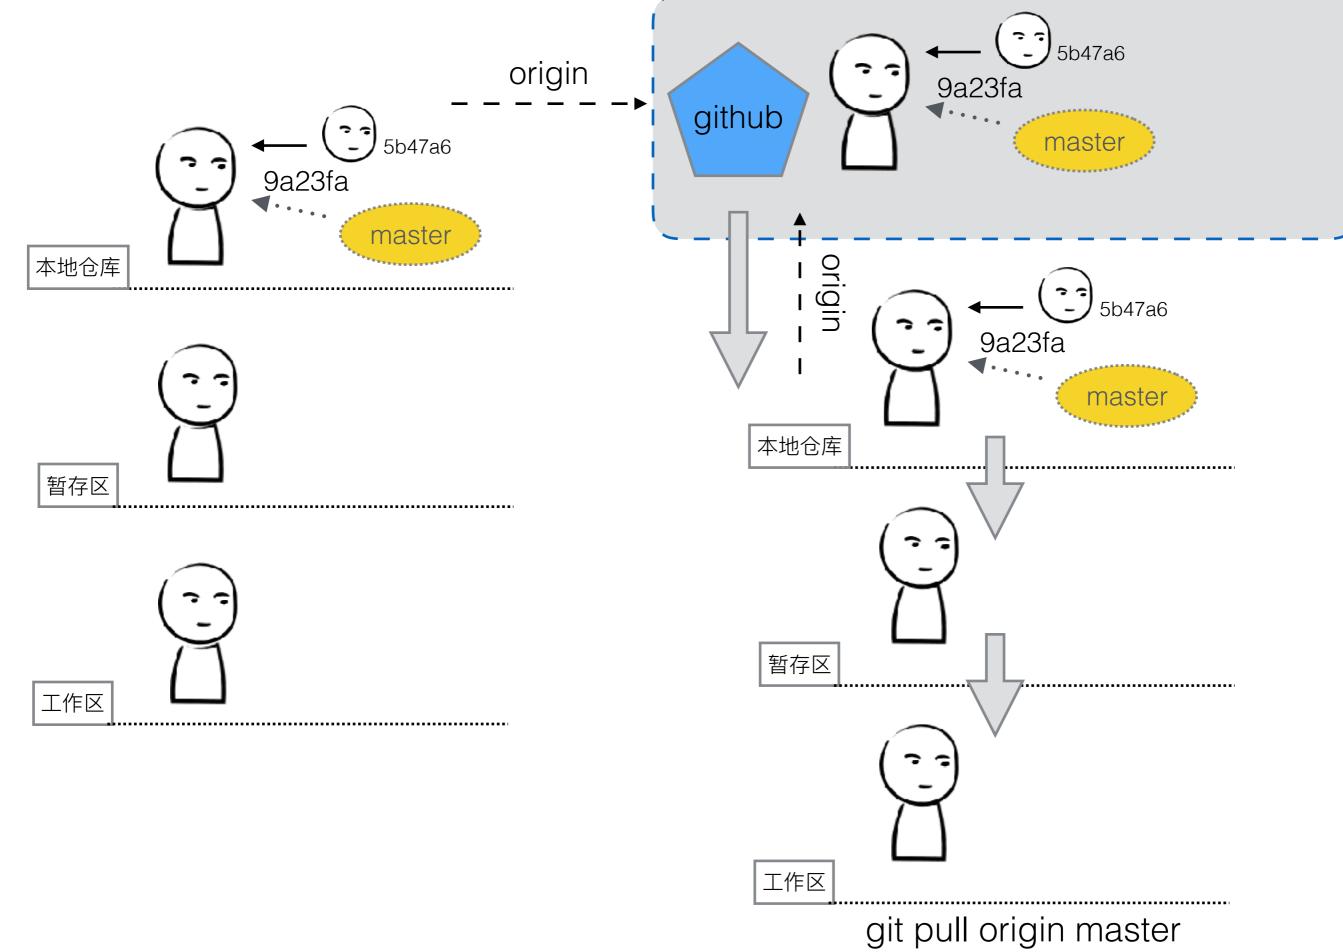

git clone http://github.com/freewind/picture.git

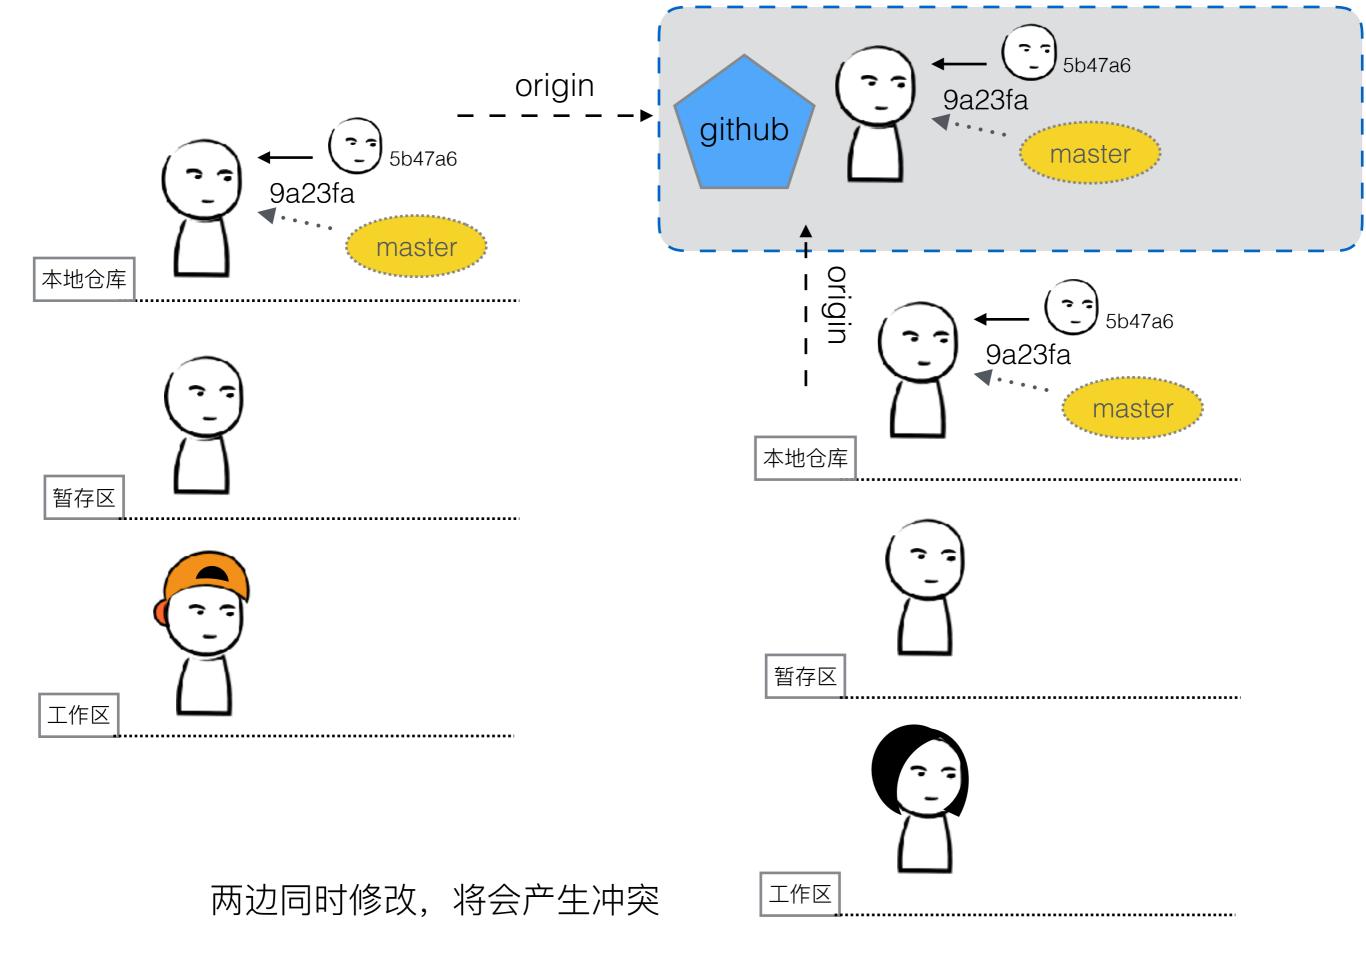

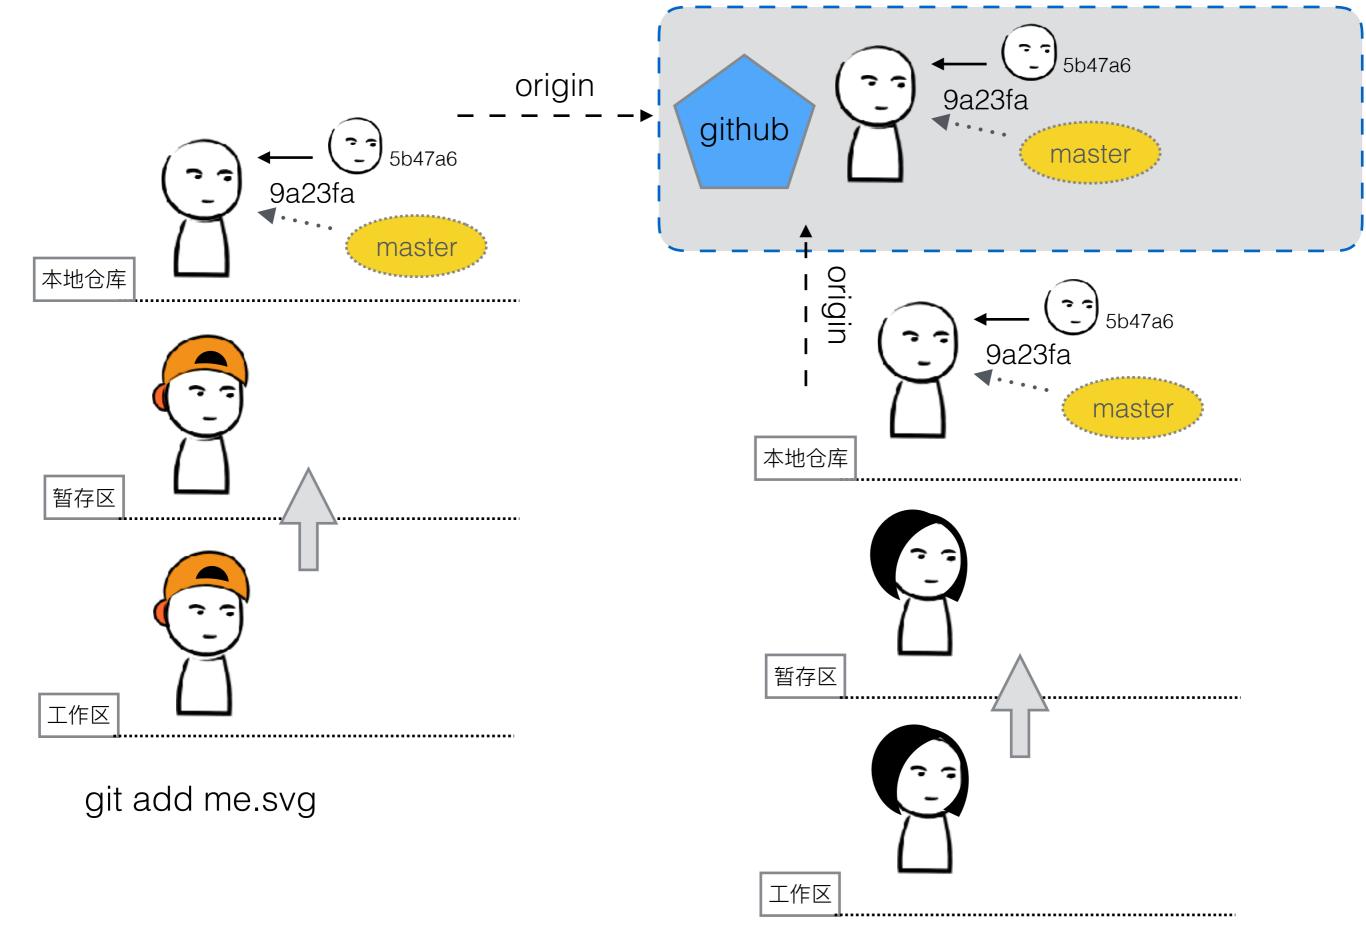

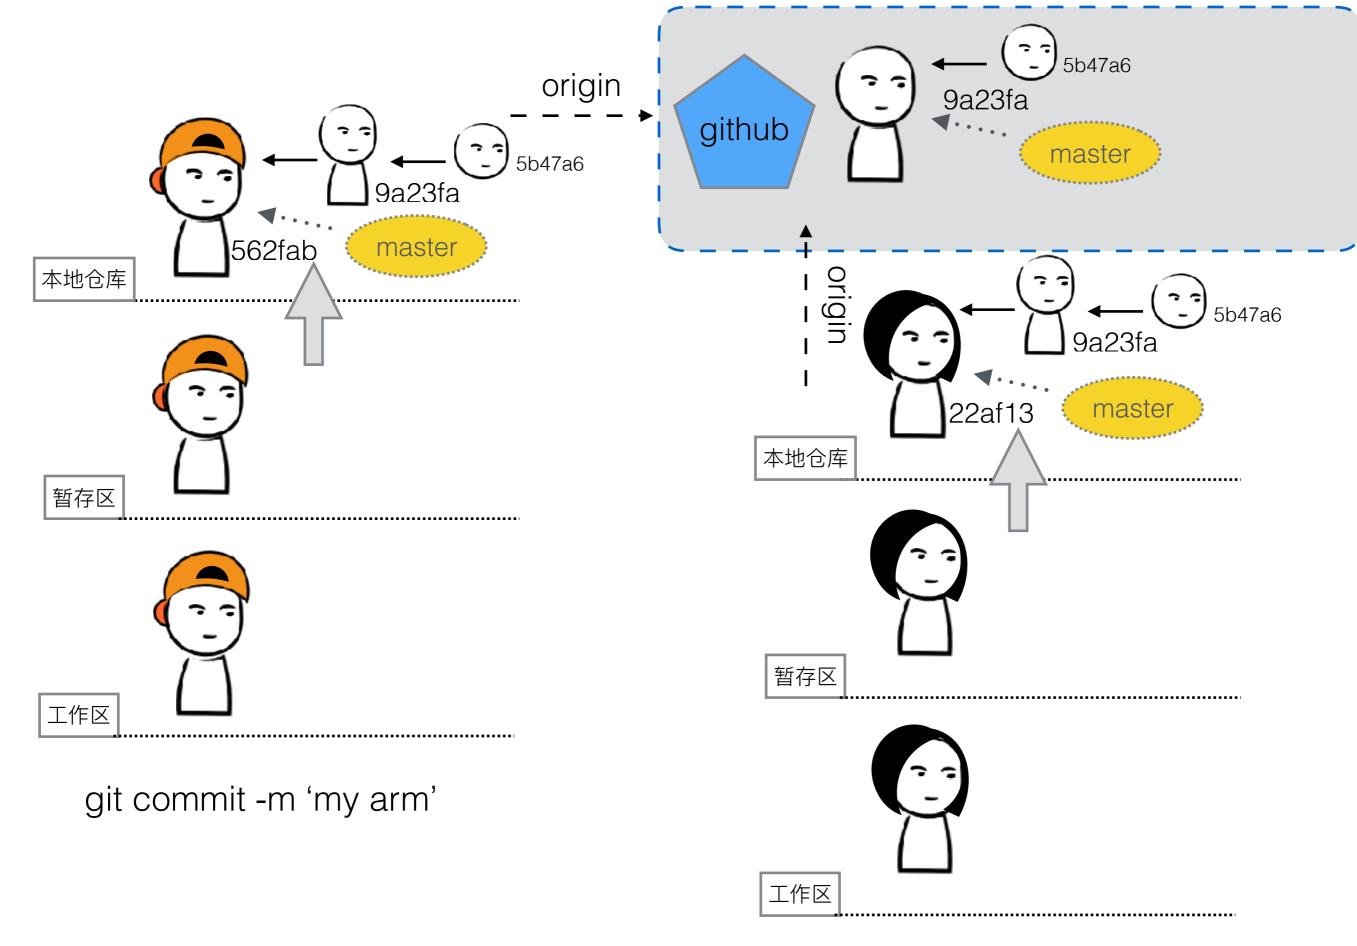

从远程仓库拉取到本地

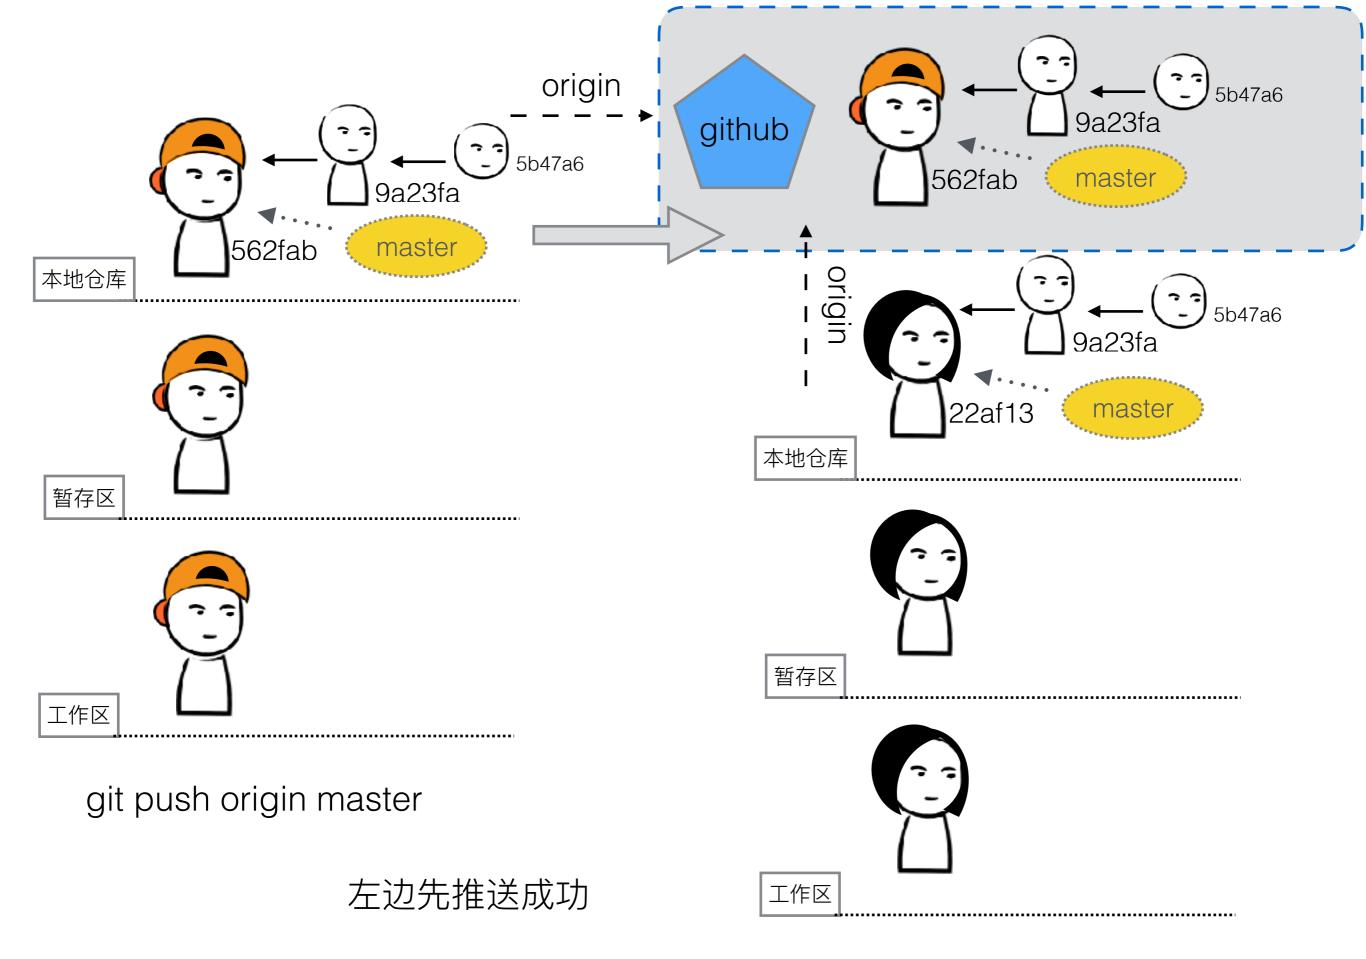

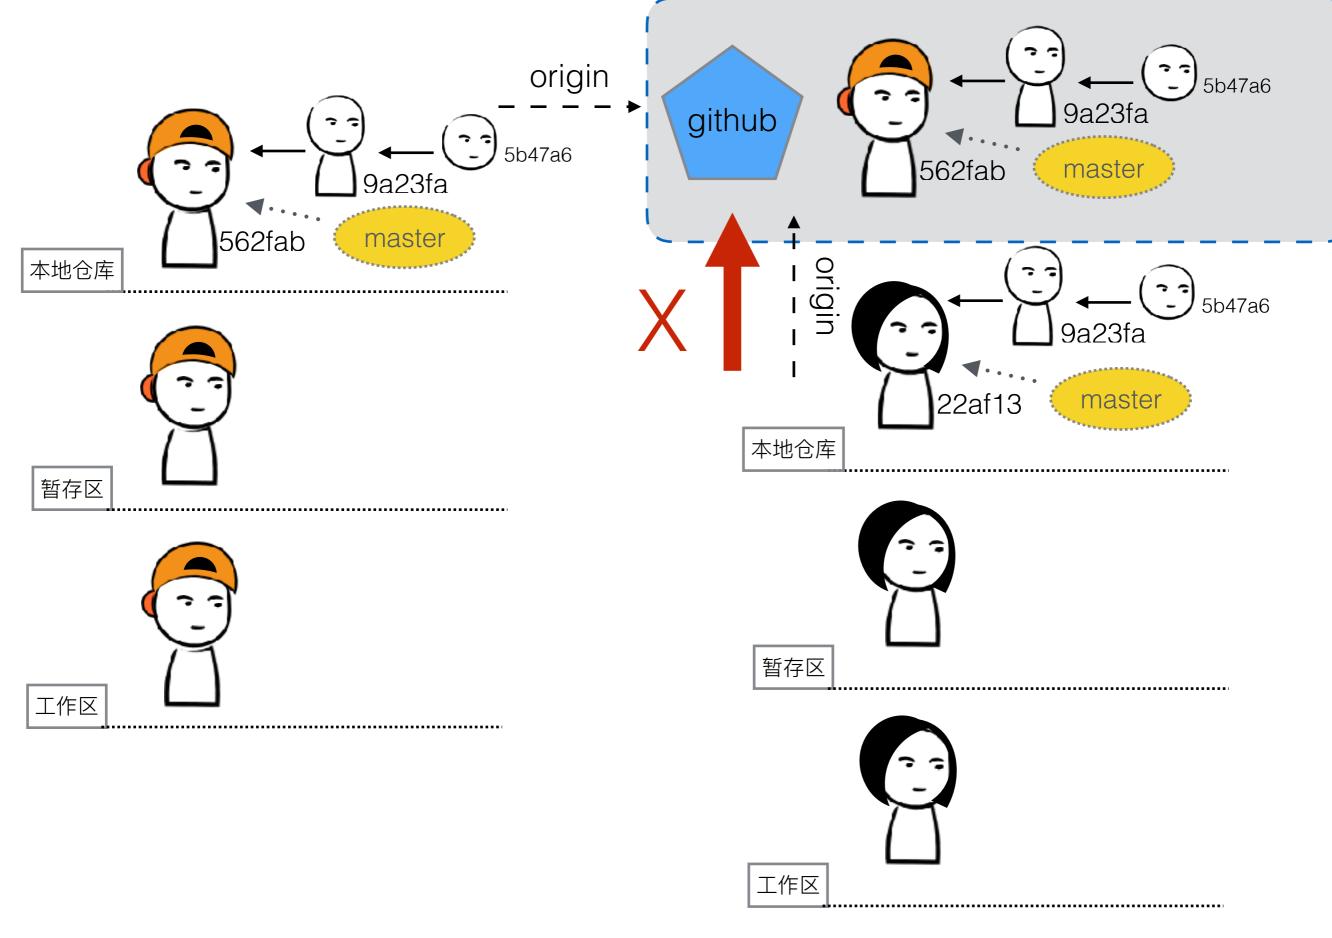

git add me.svg

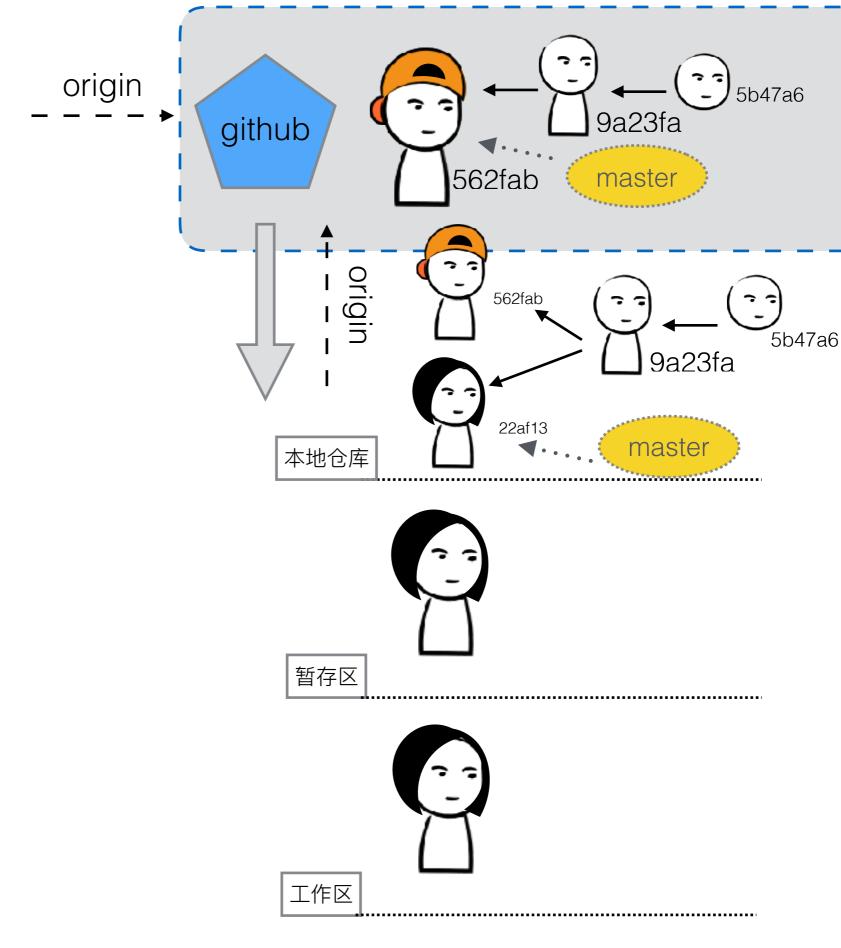

git commit -m 'my arm'

右边推送失败

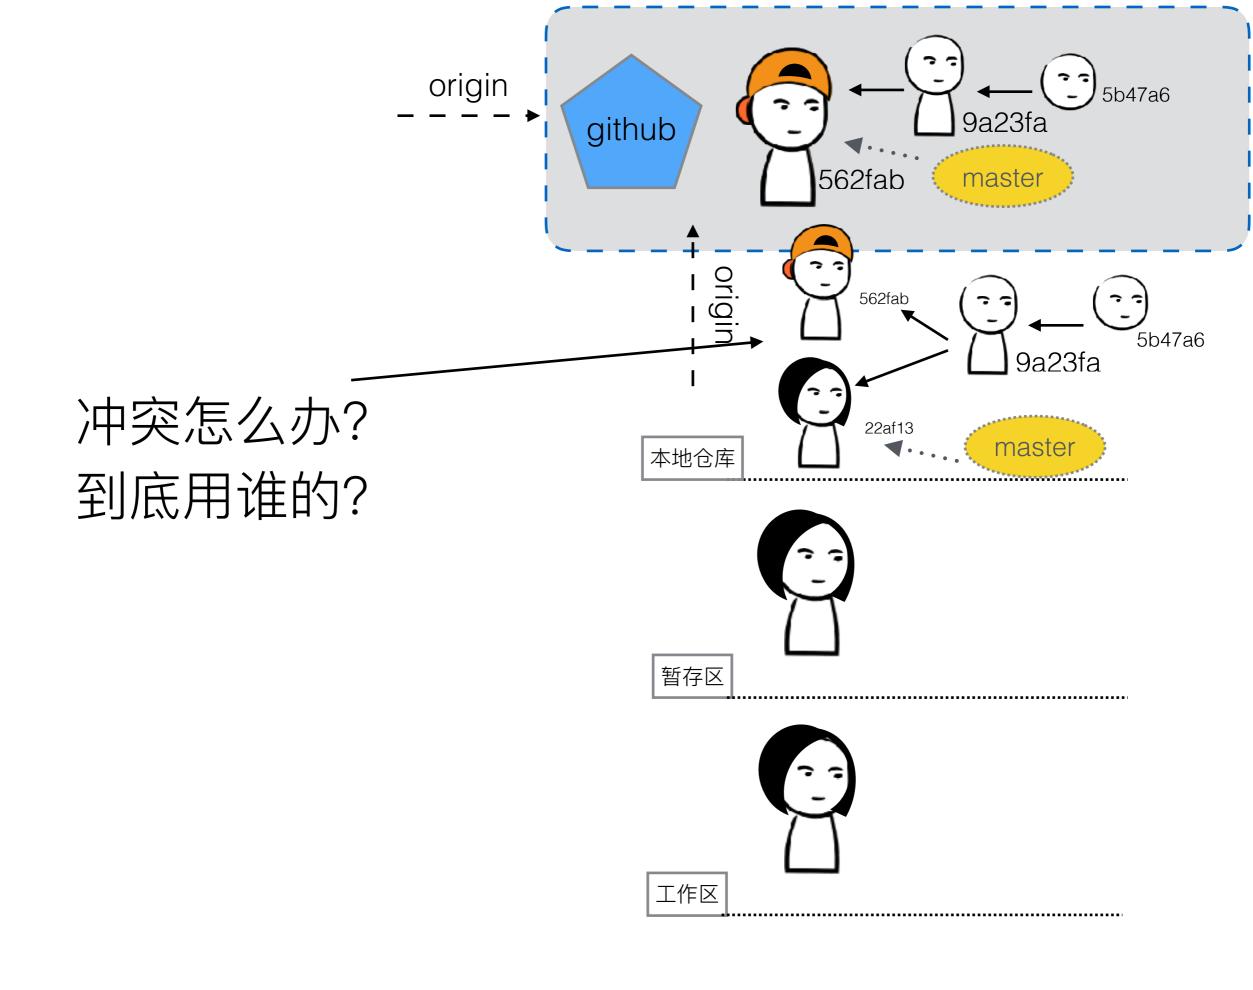

git push origin master

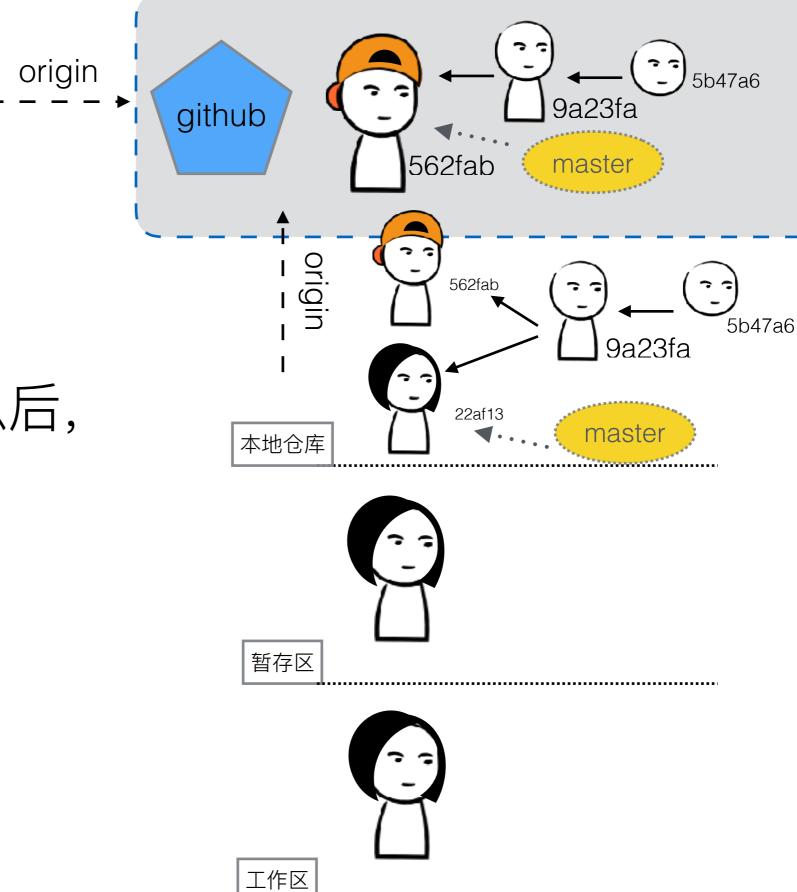

先隐藏左边

右边从远程仓库取回代码

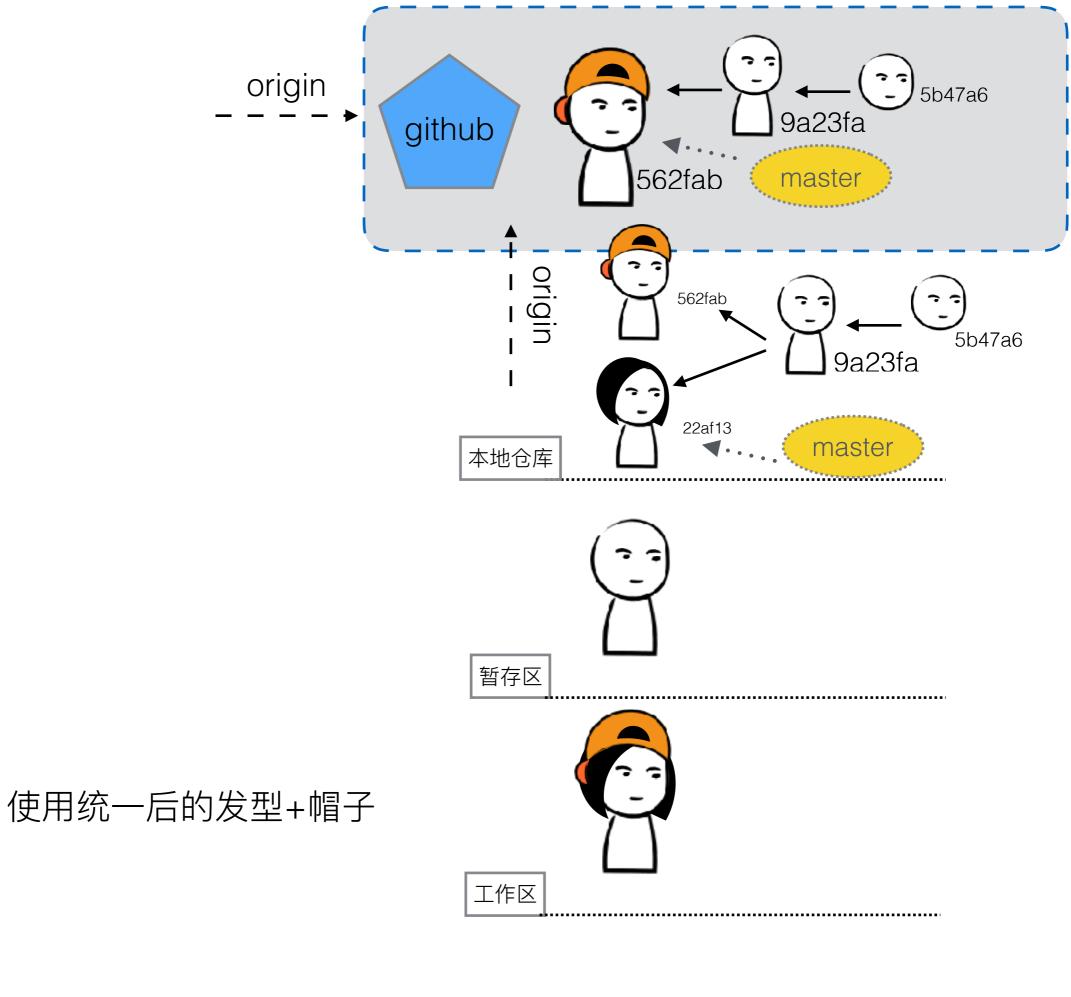

git pull origin master

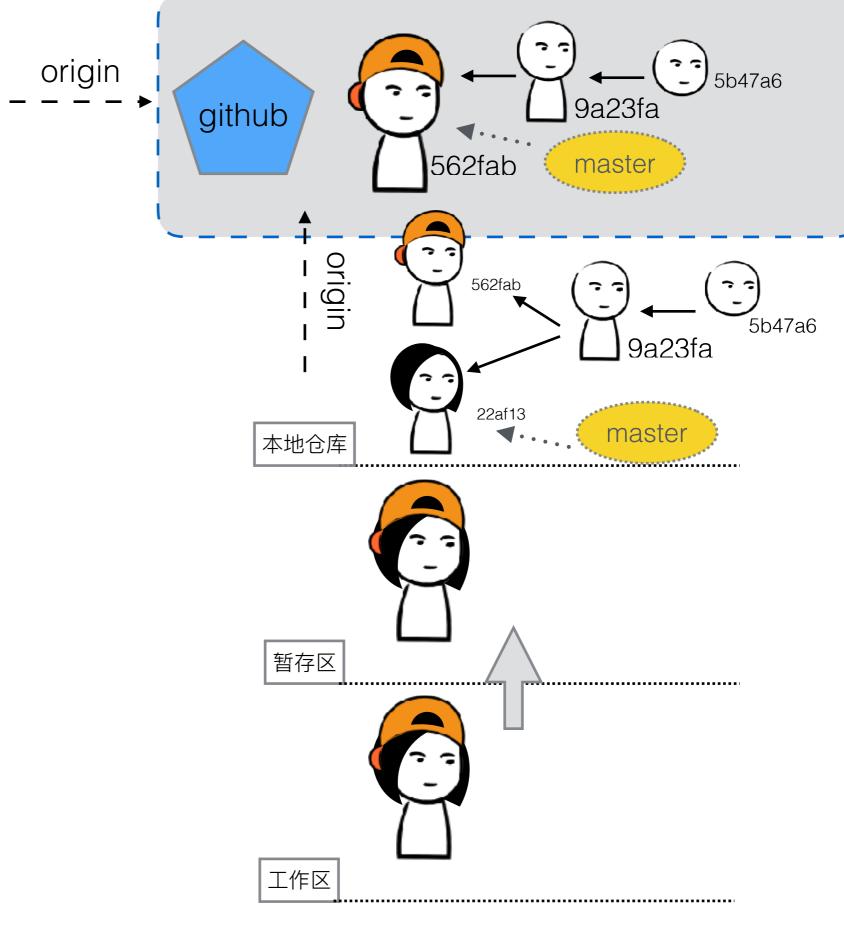

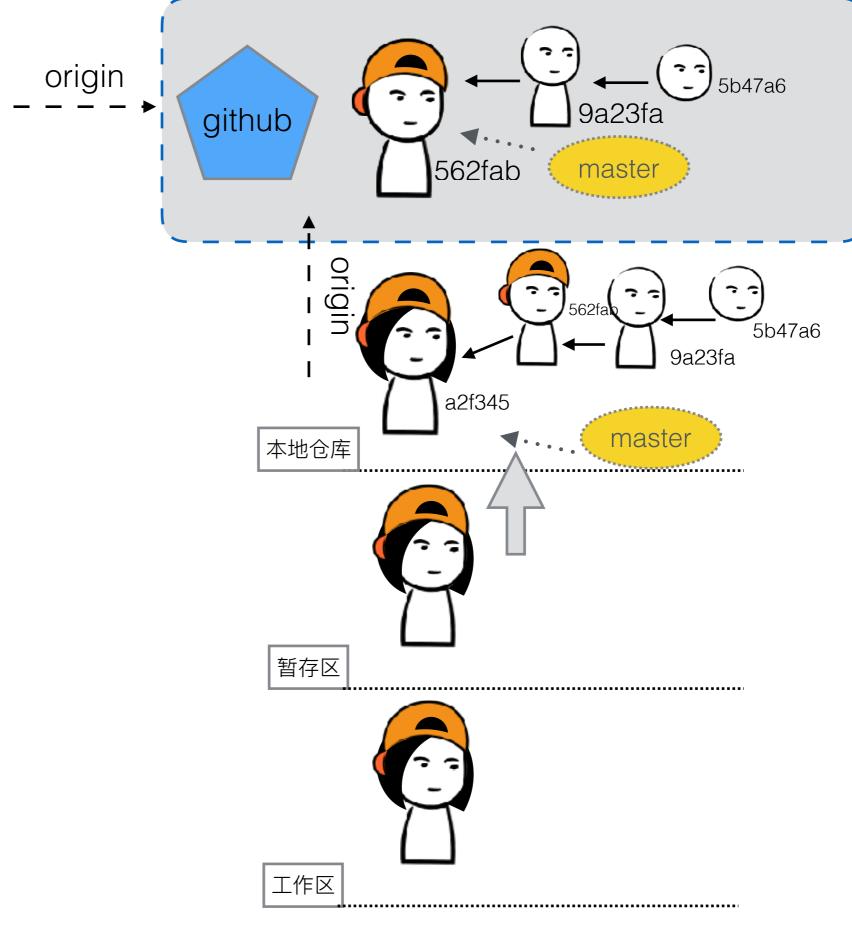

右边找左边协商以后, 决定合二为一

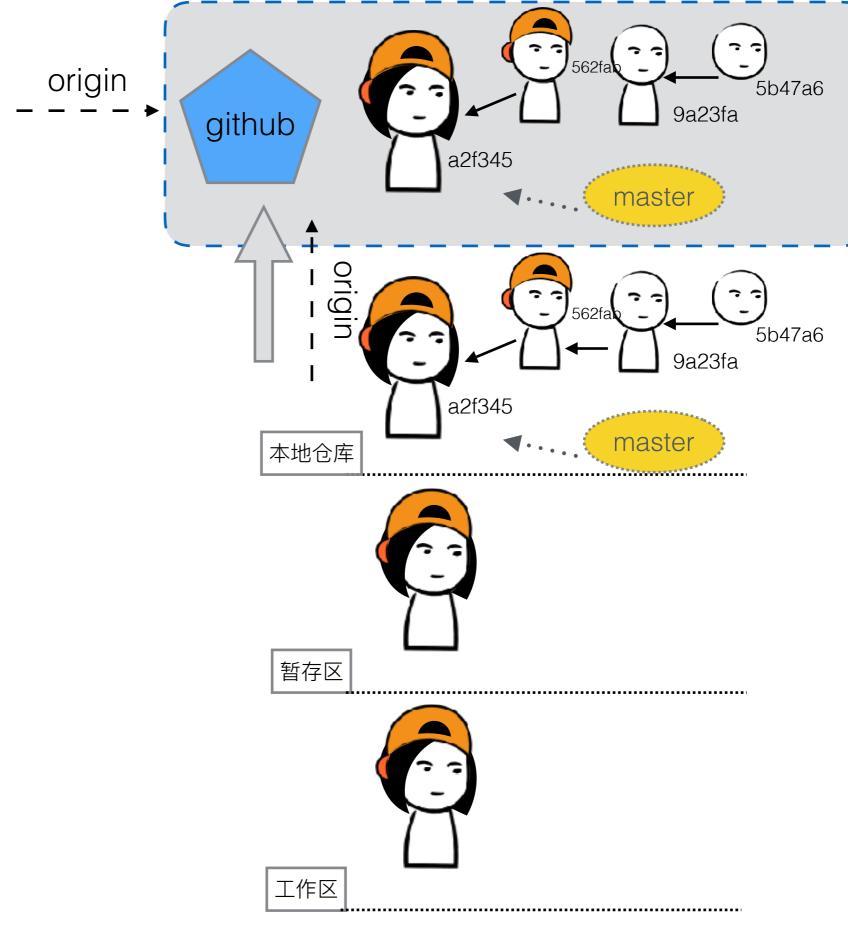

放入暂存 git add me.svg

提交到本地仓库 git commit -m 'hat and hair'

推送到远程仓库 git push origin master
